

Cisco Press - CCNA 640-802 Network Simulator(Labs)

CCNA 640-802 Network Simulator helps you develop and improve hands-on configuration and troubleshooting skills without the investment in expensive lab hardware. This state-of-the-art, interactive simulation software allows you to practice your networking skills with more than 250 structured labs designed to help you learn by doing, the most effective method of learning.

Experience realistic network device response as you work through each of the labs, which include detailed instructions, topology diagrams, hints, and full answers. Unlike other simulators on the market, the lab scenarios included in the CCNA 640-802 Network Simulator are far more complex, challenging you to learn how to perform realistic network configuration and troubleshooting tasks.

This unique network simulation software helps you master the hands-on skills needed to succeed on the CCNA® exam. Topics covered include:

- Router and switch navigation and administration
- LAN switching
- IP addressing
- Routing
- WANs
- VLANs and trunking
- IP routing protocols
- Scaling IP
- Troubleshooting
