

Free Video - CCBOOTCAMP: VRF Aware IPSec

In the network of today, multiple VRFs as well as IPSec are often used for data security. In this nine (9) minute video, **CCBOOTCAMP's Keith Barker** walks you through configuring a Site-2-Site IPSec tunnel that is VRF-aware. This is useful in preparing for CCSP and CCIE Security. [Click to watch the video now!](#) Note: Requires Quicktime...and may take a few minutes to load and start.
