

CCNA Wireless Quick Learning

The following 15-20 minutes Quick Learning Modules are focused on a specific lesson or topic from the current CCNA Wireless curriculum. This content is only accessible by Registered Users. If you have not yet registered, you will be prompted to register, before proceeding to access this content.

Explaining WLAN Technology and Standards] Upon completing this lesson, you should be able to do the following:

- Describe the Unlicensed Frequency Bands
- Describe the Radio Frequency Transmission Characteristics
- Describe the different Channels
- Describe the different 802.11 Standards
- Describe the different WLAN Security Issues

Watch Now

Exploring Wireless Networking] Upon completing this lesson, you should be able to:

- Understand the Market trends
- Differences between WLAN and LAN
- Describe Radio Frequency Transmission
- Identify Organizations which define WLAN (ITU-R, IEEE, WiFi Alliance)

Watch Now

Introduction to 802.11n] This Quick Learning Module examines the current status of 802.11n, its features and functions, as well as its expected impact on wireless technology. Watch Now
