CCSP SNRS (642-504) Quick Learning

The following Quick Learning Modules are focused on a specific lesson or topic from the current SNRS 642-504 curriculum. This content is only accessible by Registered Users. If you have not yet registered, you will be prompted to register, before proceeding to access this content. This 20-minute Quick Learning Module explains best practices and recommendations for securing Cisco IOS system devices. The module is structured around three planes, into which functions of a network device can be categorized. It also contains an overview of secure operations, which do not constitute a network plane but are very important to the overall security of a network.   Watch Now The following are learning materials provided by our Cisco Authorized Learning Partners: Unitek instructor Drew Gansmiller takes us through the inner workings of the ISAKMP protocol.   Watch the Video Now UnitekSuccessStory_2009.pdf This video discusses design of a solution for site-to-site virtual private networks (VPNs) using IPsec to provide virtualization and strong security for data in transit over the untrusted transport network.
