Setup VMWare In GNS3 and Dynamips-Dynagen

 These are links to videos created by Timw of hacki.at. Timw is a helpful guy on the forums over there and took time to create some videos on configuring VMWare to work with Dynamips/Dynagen & GNS3. In one of the Videos he also teaches you how to setup a simple frame-relay lab. **Video 1:** VMWare Server Network Setup Setting up a virtual network in VMWare Server for use with Dynamips, Dynagen and GNS3 Download   **Video 2:** Frame Relay How to use GNS3 to setup a Frame relay network using 2 routers and 2 virtual machines running in VMWare Server on a local work station. Download **Video 3:** VMWare Server Network Setup 2 Shows how to create a virtual network adapter and then connect it to a Virtual machine using VMWare Server. After that it shows how to connect the Network Adapter to a cloud in GNS3. Download **Video 4:** Saving Configs in GNS3 How to save your router configs using GNS3 0.5 Beta.   Download Enjoy .. LBS
