

Full Version - Packet Tracer v5.2.1 Application + Tutorials

Packet Tracer version 5.2.1 is a maintenance release that includes new functionality and fixes known problems in Packet Tracer version 5.2. While there are no curricula requirements that make it necessary to move to version 5.2.1 for CCNA Discovery, CCNA Exploration or CCNA Security, you may want to upgrade to the new version to take advantage of the improvements included in this release.

Packet Tracer 5.2.1 supports activities authored in Packet Tracer 4.0, 4.1, 4.11, 5.0, 5.1 and 5.2.
Packet Tracer 5.2 has been replaced by Packet Tracer 5.2.1 and is no longer available for download.

Please note that the last two courses of the CCNA Discovery and CCNA Exploration curricula require Packet Tracer version 4.11 at a minimum, and CCNA Security requires versions 5.2 at a minimum.

The curricula are fully compatible with Packet Tracer 5.2.1

You can download both the Packet Tracer application and tutorial files in one download package.
However, due to the large file size it is faster to download the application by itself, if that is all you need.

1. Packet Tracer v5.2.1 Application + Tutorials

This is the complete Packet Tracer program including tutorials as a single downloadable package for Windows 2000, XP and Vista.
