CiscoPress - Cisco Security appliance Command Line Configuration Guide

The purpose of this guide is to help you configure the security appliance using the command-line interface. This guide does not cover every feature, but describes only the most common configuration scenarios.

You can also configure and monitor the security appliance by using ASDM, a GUI application. ASDM includes configuration wizards to guide you through some common configuration scenarios, and online Help for less common scenarios. For more information, see: http://www.cisco.com/en/US/products/ps6121/tsd_products_support_series_home.html

For software Versions 8.0(4) and below, this guide applies to the Cisco PIX 500 series security appliances (PIX 515E, PIX 525, and PIX 535). The PIX security appliance is not supported in Version 8.0(5) and above.

For all software versions, this guide applies to the Cisco ASA 5500 series security appliances (ASA 5505, ASA 5510, ASA 5520, ASA 5540, and ASA 5550). The ASA 5580 is not supported in Version 8.0.

Throughout this guide, the term "security appliance" applies generically to all supported models, unless specified otherwise.
