Internetwork Expert - CCIE Emerging Technologies: IPv6 and the CCIE Lab (Online/On-Demand)

This seminar explores the evolution of the Internet Protocol and its emergence into the CCIE Lab Exam. From understanding IPv6 addressing to configuring IPv6 routing our instructors will walk you through the design and implementation of IPv6 based networks using both detailed explanations and hands-on examples.   This seminar is a must-see if you've had little to no experience implementing IPv6 in the real world. Download **[This hidden password content is only available for our VIP member.
