

Internetwork Expert – CCNP Bootcamp Class-on-Demand

INE's CCNP Bootcamp Class-on-Demand is the ultimate all-in-one solution for engineers pursuing the Cisco Certified Network Professional (CCNP) certification. This series includes more than 50 hours of instructor-led videos, along with a hands-on practice lab workbook to prepare you for the latest BSCI, BCMSN, ISCW, and ONT exams. Developed from the ground up by Brian Dennis, 5 x CCIE #2210 (Routing & Switching, ISP Dial, Security, Service Provider, Voice) and Brian McGahan, 3 x CCIE #8593 (Routing & Switching, Service Provider, Security), this series uses INE's tried and true hands-on learning approach. This unique method of delivery allows you to not only learn how advanced networking technologies work in real-world design scenarios, but to also see live Cisco IOS command line and SDM GUI examples of how to configure, verify, and troubleshoot them. Whether you are preparing for the CCNP, or brushing up for the new Core Technologies section of the CCIE Routing & Switching Lab Exam, this series will exceed all your expectations.
