

Cisco Live CCSP Securing Networks with ASA

Technical Overview of the CCSP "Securing Networks with ASA Advanced (SNAA)" certification training and technical content. This session would discuss the need for this particular training, the technical aspects of the content, and the value it adds to the business. This session would discuss the relationship between the SNAA Cisco Certification course and the CCSP certification. The Securing Networks with ASA Advanced exam is one of the exams associated with the CCSP, CCNP Security and Cisco ASA Specialist certifications. Candidates can prepare for this exam by taking the SNAA course. This exam includes simulations and tests a candidate's knowledge and ability to describe, configure, verify and manage the Cisco ASA Security Appliance product.
