

INE - CCIE Routing & Switching Self-Paced Bootcamps

INE's CCIE Routing & Switching Advanced Technologies Bootcamp is the first step in understanding CCIE level technologies and is a companion to the Advanced Technologies Lab Workbook. Each technology you need to know for the CCIE Routing & Switching lab will be described in detail using an instructor led hands on demonstration. The class consists of nearly 80 hours of in depth explanations and examples. At your convenience, join our highly certified team of CCIE instructors for a comprehensive look at lab exam blueprint topics. The CCIE Routing & Switching Advanced Technologies Bootcamp is presented on-screen using a sequence of slides, lectures, explanations, diagrams, and live command-line viewing. This 80+ hour class is presented in an easy to follow format and allows you to choose from a variety of convenient study methods.

Bootcamp Outline Week One of the bootcamp includes 40+ hours of hands-on lecture on core CCIE Routing & Switching topics, and is spent exposing the fundamental principles behind the technologies covered in the CCIE Routing & Switching Lab Exam. This week is designed to provide you with foundational technical understanding, not to supply candidates with tips and tricks to pass your Lab Exam. Week Two of bootcamp includes another 40+ hours of hands-on lecture of advanced topics and scenarios. This second week of the advanced technologies bootcamp will take the student's understanding to the next level required to obtain the CCIE certification. Candidates will delve deep into advanced implementations of the topics covered in week one, as well as into advanced interactions that occur when technologies are implemented in tandem. Understanding the topics covered in week two will ensure that students are ready to take the next step in their CCIE preparation, applying the technologies in full-scale 8-hour lab scenarios.

Week 1 * Layer 2 Technologies * IP Routing * Quality of Service * IP Services * Security
Week 2 * Layer 2 Technologies * IP Routing * Quality of Service * IP Services * Security * MPLS VPN * New Security Features

Free Sample View a free sample of the Routing & Switching Advanced Technologies Class. **Intended Audience** CCIE Routing & Switching candidates who have already obtained their CCNP or have equivalent level of knowledge. This Bootcamp is also beneficial to those CCIE candidates who have attempted the actual CCIE lab exam without passing and need to build on their understanding of the fundamental topics. These topics include IGP Redistribution, BGP, IPv6, and QoS. Download; | **Size: 7.39 GB** **[This hidden password content is only available for our VIP member. Become VIP Member NOW**
