

CCNP Wireless - Cisco Unified Wireless Mobility Services (IUWMS) v1.0 Study Guide

Implementing Cisco Unified Wireless Mobility Services (IUWMS) v1.0 is an instructor-led course presented by Cisco training partners to their end-user customers. This five-day course is designed to help learners prepare for the CCNP-Wireless certification, a professional-level certification specializing in the wireless field. The IUWMS course is a component of the CCNP-Wireless curriculum. The IUWMS course is designed to provide professionals with information to prepare them to integrate mobility services into the network, tune and troubleshoot the WLAN, and implement indoor enterprise mesh networks. The IUWMS course reinforces the instruction by providing labs to ensure that learners thoroughly understand how to implement mobility services in the wireless network. The 642-746 IUWMS Implementing Cisco Unified Wireless Mobility Services exam is the exam associated with the CCNP Wireless certification. This exam assesses a candidate's capability to integrate mobility services into the WLAN, to tune and troubleshoot the WLAN, and to implement indoor enterprise mesh networks. Candidates can prepare for this exam by taking the IUWMS Implementing Cisco Unified Wireless Mobility Services course.
