CCNP Wireless - Cisco Unified Wireless Voice Networks (IUWVN) version1.0 Study Guide

 Implementing Cisco Unified Wireless Voice Networks (IUWVN) version1.0 is an instructor-led course presented by Cisco training partners to their end-user customers. This five-day course is designed to help students prepare for the CCNP-Wireless certification, a professional-level certification specializing in the wireless field. The IUWVN course is a component of the CCNP-Wireless curriculum. The IUWVN course is designed to give students a firm understanding of how to integrate voice-over-WLAN (VoWLAN) services into the WLAN and be able to implement quality of service (QoS) and high-bandwidth applications into the wireless network.   The 642-741 IUWVN Implementing Cisco Unified Wireless Voice Networks exam is the exam associated with the CCNP Wireless certification. This exam assesses a candidate's capability to integrate VoWLAN services into the WLAN and be able to implement QoS, MPLS, and high bandwidth applications into the wireless network. Candidates can prepare for this exam by taking the IUWVN Implementing Cisco Unified Wireless Voice Networks course.
