Cisco Press - CANAC Implementing Cisco NAC Appliance Lab Guide.Ver.2.1

The 642-591 CANAC Implementing Cisco NAC Appliance exam is associated with both the Cisco Certified Security Professional and the Cisco Network Admission Control Specialist certifications. Candidates can prepare for this exam by taking the Implementing Cisco NAC Appliance course. This exam tests a candidate's knowledge of the Cisco NAC Appliance solution. This guide presents the instructions and other information concerning the lab activities for this course. Note: This lab assumes that the Cisco NAS and the Cisco NAM software have been installed and that the Cisco NAC Appliance database has been repopulated with the required data. Therefore, the Cisco NAS and Cisco NAM can now be configured using the student lab. The instructor or remote lab support personnel carried out these activities prior to the start of this lab.
