

CCBootCamp's CCIE Voice Technology Lab Workbook Version 3.0

CCBOOTCAMP's new CCIE Voice Lab Technology Lab Workbook is designed to specifically prepare students to understand the core technologies of the CCIE Voice lab exam. This 360+ page voice technology lab workbook breaks down major voice technologies such as, Basic Campus Design, Voice Gateway and Signaling, Voice Codec, Presence and much more, into specific chapters. Voice lab scenarios and well documented solutions including explanations and screen shots are included. Along with your lab preparation material you will have access to CCBOOTCAMP's Voice Forum, where you can discuss voice topics with CCBOOTCAMP's CCIE Voice instructors and other students preparing for the CCIE Voice Lab Exam. The voice technology lab workbook published by CCBOOTCAMP, a Cisco Learning Solutions Partner, is designed in part to prepare you for attending our CCIE Voice Lab Boot Camps. **Table of Contents** INCLUDES: complete step-by-step, walk throughs and solutions * Chapter 1: Basic Campus Design * Chapter 2: Call Manager and Call Manager Express Configuration * Chapter 3: Voice Gateway and Signaling * Chapter 4: Call Routing * Chapter 5: Voice Codec * Chapter 6: Call Admission Control * Chapter 7: High Availability Features * Chapter 8: Media Resource Management * Chapter 9: QoS Considerations * Chapter 10: Unity Connections * Chapter 11: CRS/IPCC Express Application * Chapter 12: CallManager Voice Applications * Chapter 13: Supplementary Services * Chapter 14: Fax * Chapter 15: Presence Download | **Size:** 65.92 MB **[This hidden password content is only available for our VIP member.
