

INE - CCIE Security Lab Preparation Bootcamp Training

The CCIE Security Lab Preparation Bootcamp focuses on developing a structured approach to passing CCIE Lab Exam along with how to interpret CCIE Lab Exam questions and implement their solution. During this bootcamp, candidates will concentrate on hands-on scenarios as they work through advanced CCIE level material not found in any of our other products. Since this bootcamp is presented in a self-paced format candidates can follow along at their own pace with our instructors. This bootcamp not only provides the practical knowledge needed to pass the CCIE Lab Exam, but also the real-world experience and understanding needed by senior security engineers in their day-to-day job. **Lab Preparation Bootcamp Outline:**
