### Example 1. Drag and Drop Questions

### Example 2. Lab - Access List Simulation

A network associate is adding security to the configuration of the Corp1 router. The user on host C should be able to use a web browser to access financial information from the Finance Web Server. No other hosts from the LAN nor the Core should be able to use a web browser to access this server. Since there are multiple resources for the corporation at this location including other resources on the Finance Web Server, all other traffic should be allowed.

**The task** is to create and apply an access-list with no more than three statements that will allow ONLY host C web access to the Finance Web Server. No other hosts will have web access to the Finance Web Server. All other traffic is permitted.

Access to the router CLI can be gained by clicking on the appropriate host.

All passwords have been temporarily set to "cisco".

The Core connection uses an IP address of 198.18.196.65

The computers in the Hosts LAN have been assigned addresses of 192.168.33.1 - 192.168.33.254.

- o host A 192.168.33.1
- o host B 192.168.33.2
- o host C 192.168.33.3
- o host D 192.168.33.4

The servers in the Server LAN have been assigned addresses of 172.22.242.17 - 172.22.242.30

The Finance Web Server is assigned an IP address of 172.22.242.23

### Example 3. Lab ? EIGRP Troubleshooting

After adding BLD-102 router, no routing updates are being exchanged between BLD-102 and the new location. All other interconnectivity and Internet access for the existing locations of the company are working properly.

**The task** is to identify the fault(s) and correct the router configurations to provide full connectivity between the routers.

Access to the router CLI can be gained by clicking on the appropriate host.

All passwords on all routers are cisco.

You may need to scroll this window and the problem statement window.

Click on picture of host connected to the specified router and select the CiscoTerminal option to configure the router. If you select the wrong host, click on the show topology button and select

Hide Topology

### Example 4. Lab ? VTP Simulation

1 What interface did Sw-AC3 associate with source MAC address 0010.5a0c.ffba?
