QUESTION 81 You are managing a SharePoint environment. All SharePoint databases reside on servers that run Microsoft SQL Server 2012. You observe an increase in the consumption of disk space by the SharePoint configuration database. You need to minimize disk space usage. Which recovery model should you set? A.&#160;&#160;&#160; Transactional

B.&#160;&#160;&#160; Full C.&#160;&#160;&#160; Bulk-logged D.&#160;&#160;&#160; Simple Answer: D

QUESTION 82 A SharePoint environment contains a single web application at http://web01. You create a site collection under the web application. The site collection has the URL http://sharepoint.contoso.com. You need to ensure that the site collection is also accessible at http://intranet.contoso.com. What should you do? A.&#160;&#160;&#160; Add intranet.contoso.com as an alternate access mapping for the web application. B.&#160;&#160;&#160; Extend the web application and add intranet.contoso.com to the Intranet Zone. C.&#160;&#160;&#160; Run the Set-SPSiteUrl Windows PowerShell cmdlet. D.&#160;&#160;&#160; Run the New-SPSite Windows PowerShell cmdlet. Answer: C

QUESTION 83 You are the term store manager of a SharePoint environment. You need to make term sets available across the entire farm. You must ensure that users can reuse terms but not edit terms. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

A.&#160;&#160;&#160; Prohibit the use of keywords other than those in a specific term set. B.&#160;&#160;&#160; Create a global term set. C.&#160;&#160;&#160; Enable term pinning. D.&#160;&#160;&#160; Prohibit grid editing in the Datasheet view. E.&#160;&#160;&#160; Create a local term set. Answer: AB

QUESTION 84 You are managing a SharePoint farm. You need to collect information about the health of a web application. What should you use? A.&#160;&#160;&#160; SharePoint Health Analyzer B.&#160;&#160;&#160; Windows Management Instrumentation (WMI) C.&#160;&#160;&#160; SharePoint Developer Dashboard D.&#160;&#160;&#160; timer jobs Answer: D

QUESTION 85 You are managing a site collection in a SharePoint farm. You need to configure the minimum level of permissions necessary for users to manage lists in the site collection. What permission level should you configure? A.&#160;&#160;&#160; Full Control B.&#160;&#160;&#160; Create

C.&#160;&#160;&#160; Design D.&#160;&#160;&#160; Contribute Answer: C

QUESTION 86 A company has a SharePoint environment that consists of two web applications. The first web application is used as the corporate intranet site, and the second web application hosts several custom apps. The custom apps use Microsoft Business Connectivity Services (BCS) Web Parts to retrieve data from external systems. The home page of the second web application displays information from three custom apps and renders slowly. You need to identify the custom app that is causing the slow response times. Which tool should you use?

A.&#160;&#160;&#160; SharePoint Web Analytics service application B.&#160;&#160;&#160; SharePoint audit log reports C.&#160;&#160;&#160; SharePoint Health Analyzer D.&#160;&#160;&#160; Developer Dashboard Answer: A

QUESTION 87 You are managing a SharePoint farm. The SharePoint databases are configured to run on a dedicated instance of Microsoft SQL Server 2008 R2 Service Pack 1. You need to optimize query executions. What should you do? A.&#160;&#160;&#160; Move the SharePoint databases to a RAID 10 volume. B.&#160;&#160;&#160; Move the SharePoint databases to a RAID 5 volume.

C.&#160;&#160;&#160; Set the maximum degree of parallelism for SQL Server instances to 4. D.&#160;&#160;&#160; Set the maximum degree of parallelism for SQL Server instances to 0. Answer: D

QUESTION 88 A company is planning to upgrade from SharePoint 2010 to SharePoint 2013. You need to find out the web traffic capacity of the SharePoint farm by using a Microsoft Visual Studio Team System project file. Which tool should you use? A.&#160;&#160;&#160; Network Monitor

B. SharePoint Health Analyzer C. SharePoint Diagnostic Studio  
D. Load Testing Kit (LTK) Answer: D QUESTION 89 You install SharePoint Server in a three-tiered server farm that meets the minimum requirements for SharePoint 2013 and surrounding technologies. The content databases will reside on Fibre Channel drives in a storage area network (SAN). The backup solution will utilize SAN snapshots. You are estimating storage requirements. You plan to migrate 6 TB of current content from file shares to SharePoint. You need to choose the content database size that will optimize performance, minimize administrative overhead, and minimize the number of content databases. Which content database size should you choose? A. 100 GB B. 200 GB  
C. 3 TB D. 6 TB Answer: C QUESTION 90 You plan to create a workflow design by using Microsoft Visio 2013 and then import the design into SharePoint Designer 2013. You need to ensure that you have repetition capability. Which shape should you use? A. Stage B. Assign a Task  
C. Step D. Loop Answer: A

<http://www.passleader.com/70-488.html> QUESTION 91 You plan to create a SharePoint Business Process Automation (BPA) project. You need to process items for approval with the least amount of developer effort. Which tool should you use? A. Remote Event Receiver B. Out-of-the-box workflow C. SharePoint Designer workflow D. Work Item Timer Job Answer: B QUESTION 92 You must select an app model to deploy apps to an Office 365 small business tenant. The business logic of the apps is located in a remote web application. What should you do? A. Create a SharePoint-hosted app. Implement the business logic by using JavaScript. B. Develop provider-hosted apps and integrate data sources with the business logic by using OData. C. Deploy the business logic to the host web by using a Full Trust SharePoint solution. D. Develop an OData service provider infrastructure and publish the provider to the \_layouts directory. Answer: C QUESTION 93 A company has a SharePoint farm that has the following configuration: - SPWFE1 and SPWFE2 are configured as front-end web servers. - SPAPP1 and SPAPP2 are configured as application servers. - New servers will be added to the farm. You implement a solution that contains a custom navigation provider. You need to register a custom navigation provider by using the least amount of administrative effort. What should you do? A. Create a web.solutionname.xml file in the CONFIG directory and run the copyappbincontent Stsadm command. B. Edit the ApplicationHost.config file on each SharePoint server. C. Edit the web.config file for the web application on all SharePoint servers. D. Use the SPWebConfigModification class. Answer: D QUESTION 94 Adventure Works uses SharePoint to store product and order information. Product managers visit the Products list to see the status of each product. They request a feature that will allow them to easily see the recent and old product orders without opening the Products list. The products orders page is located at /sitepages/productorders.aspx, and the product order history page is located at /sitespages/productordershistory.aspx. Both pages require a query string parameter named ProductID. You need to add custom actions to the Products list by using the least amount of administrative effort. What should you do? A. Add an empty element to the SharePoint project. Add a <CustomAction> tag, set the Location element to EditControlBlock, and then use the <UrlAction> tag for a redirect to the custom page. B. Create a Windows Application and add a reference to Microsoft.SharePoint.Portal.CustomActions.dll and use the SPCustomActions class to add a custom action. C. Open the site in SharePoint Designer. Create a custom List Item Display Template and then apply it to the Products List View Web Part. D. Create a visual Web Part. Use a grid view with a template column and hyperlink, and databind the Products list. Add the Web Part to the allitems.aspx page of the Products list. Answer: D QUESTION 95 A SharePoint farm has a very large search index. Users report that search results are too broad. You need to ensure that properties can be used to refine search results. Which two options should you configure? (Each correct answer presents part of the solution. Choose two.) A. Searchable B. Queryable C. Complete Matching D. Retrievable E. Refinable F. Sortable Answer: BD QUESTION 96 You are managing a SharePoint farm in an Active

Directory Domain Services (AD DS) forest. The forest contains two domains named americas.contoso.com and europe.contoso.com. A single SharePoint farm is located in the americas.contoso.com domain and uses Kerberos authentication. Users in the europe.contoso.com domain cannot access the Excel Services application in the americas.contoso.com domain when using an external data source. You need to ensure that users in the europe.contoso.com domain can use the Excel Services application with external data sources. What should you do? A.&#160;&#160;&#160; Deploy a SharePoint farm in the europe.contoso.com domain. B.&#160;&#160;&#160; Configure Kerberos constrained delegation. C.&#160;&#160;&#160; Configure basic Kerberos delegation. D.&#160;&#160;&#160; Configure anonymous access in the SharePoint farm. Answer: A QUESTION 97 A company's SharePoint environment contains three web applications. The company must record the following information for each document in any of the three web applications: The date and time at which the document was last reviewed. Additional custom date and time information as requirements are identified. You have the following requirements: - Ensure that the current information is available when searching content and for refining search results. - Ensure that the additional custom date and time information can be assigned to content in all web applications. - Ensure that SharePoint users who are not farm administrators can record additional date and time information as required. You need to meet the requirements. What should you do? A.&#160;&#160;&#160; Create a column of data type Date and Time in a document library in each site collection. B.&#160;&#160;&#160; In Central Administration, create a term set with a term of data type Date and Time. C.&#160;&#160;&#160; Create a content type that uses a custom field of data type Date and Time in each site collection. D.&#160;&#160;&#160; Create a site column of data type Date and Time in each site collection. Answer: B QUESTION 98 You are managing a SharePoint farm. The SharePoint databases are configured to run on a dedicated instance of Microsoft SQL Server 2008 R2 Service Pack 1. You need to optimize query executions. What should you do? A.&#160;&#160;&#160; Set the maximum degree of parallelism for SQL Server instances to 4. B.&#160;&#160;&#160; Set the maximum degree of parallelism for SQL Server instances to 1. C.&#160;&#160;&#160; Move the master database to a RAID 5 volume. D.&#160;&#160;&#160; Set the maximum degree of parallelism for SQL Server instances to 32. Answer: B QUESTION 99 Drag and Drop Question You have a large list that contains more than 5,000 list items. You need to iterate through the list by using the Content Iterator to avoid getting an exception. You have the following code:

```
string Target 1 = "<View/>";
Target 2 iterator = new Target 3();
SPQuery listQuery = new SPQuery();
listQuery.Query = Target 4;
SPList list = Target 5.CurrentWeb.Lists["IndividualCustomer"];
iterator.Target 6(list,
listQuery,
ProcessItem,
ProcessError
);
```

Which code segments should you include in Target 1, Target 2, Target 3, Target 4, Target 5 and Target 6 to complete the code? (To answer, drag the appropriate code segments to the correct location or locations in the answer area. Each code segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content)

**Code Segments**

query1

SPList

SPList

SPContext

ContentIterator

ProcessListItems

Answer:

**Code Segments**

query1

SPList

SPLITITEM

SPContext

ContentIterator

ProcessListItems

**Answer Area**

Target 1: query1

Target 2: ContentIterator

Target 3: ContentIterator

Target 4: query1

Target 5: SPContext

Target 6: ProcessListItems

QUESTION 100 Drag and Drop Question You develop a SharePoint app to access data contained in a hosted SharePoint site. You need to authorize the app to access the list items in a custom list on the host website. You have the following code:

```
Target 1.TrustAllCen
string Target 2 =
Target 3.GetContext
if (contextTokenStr
{
    contextToken = Tar
    (Target 5, Requ
    sharepointUrl = ne
    accessToken = Toke
    (contextToken, sha
    Button1.CommandArg
}
```

Which code segments should you include in Target 1, Target 2, Target 3, Target 4, Target 5 and Target 6 to complete the code? (To answer, drag the appropriate code segments to the correct location or locations in the answer area. Each code segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content)

**Code Segments**

ServiceHost

SecurityTokenContex

+

TokenHelper

GetAccessToken

contextTokenStr

Answer:

**Code Segments**

ServiceHost

SecurityTokenContex

+

TokenHelper

GetAccessToken

contextTokenStr

**Answer Area**

Target 1: TokenHelper

Target 2: contextTokenStr

Target 3: TokenHelper

Target 4: TokenHelper

Target 5: contextTokenStr

Target 6: GetAccessToken
