[New Exam Dumps Premium 308q 640-554 Exam Questions Ensure 100 Percent Exam Passing

New Updated 640-554 Exam Questions from PassLeader 640-554 PDF dumps! Welcome to download the newest PassLeader 640-554 VCE dumps: **http://www.passleader.com/640-554.html** (308 Q&As) Keywords: 640-554 exam dumps, 640-554 exam questions, 640-554 VCE dumps, 640-554 PDF dumps, 640-554 practice tests, 640-554 study guide, 640-554 braindumps, Implementing Cisco IOS Network Security (IINS v2.0) Exam NEW QUESTION 281   Which address block is reserved for locally assigned unique local addresses? A.   2002::/16   B.   FD00::/8   C.   2001::/32   D.   FB00::/8   Answer: B NEW QUESTION 282   What is a possible reason for the error message?   Router(config)#aaa server?% Unrecognized command   A.   The command syntax requires a space after the word "server"   B.   The command is invalid on the target device   C.   The router is already running the latest operating system   D.   The router is a new device on which the aaa new-model command must be applied before continuing Answer: D NEW QUESTION 283   Which statements about smart tunnels on a Cisco firewall are true? (Choose two.) A.   Smart tunnels can be used by clients that do not have administrator privileges   B.   Smart tunnels support all operating systems   C.   Smart tunnels offer better performance than port forwarding   D.   Smart tunnels require the client to have the application installed locally Answer: AD   Explanation: Smart Tunnel is also used to provide remote access to web applications that are difficult to rewrite, such as proprietary, non-standards-based Java, Java Script, or Flash animations.   Smart Tunnel also supports Single Sign-On to web applications that require either form-based POST parameters, http basic, FTP, or NTLM authentication   Smart Tunnel can also co-exist with a Full-Tunnel VPN Client. For example, an employee can connect to the company network by using Full-Tunnel VPN Client, while simultaneously connecting to a vendor network by using Smart Tunnel.   Smart Tunnel Advantages over Port-Forwarding, Plug-ins   Smart Tunnel offers better performance than browser plug-ins.   Port forwarding is the legacy technology for supporting TCP-based applications over a Clientless SSL VPN connection. Unlike port forwarding, Smart Tunnel simplifies the user experience by not requiring the user connection of the local application to the local port.   Smart Tunnel does not require users to have administrator privileges.   Smart Tunnel does not require the administrator to know application port numbers in advance. NEW QUESTION 284   Which option describes information that must be considered when you apply an access list to a physical interface? A.   Protocol used for filtering   B.   Direction of the access class   C.   Direction of the access group   D.   Direction of the access list Answer: C NEW QUESTION 285   Which source port does IKE use when NAT has been detected between two VPN gateways? A.   TCP 4500   B.   TCP 500   C.   UDP 4500   D.   UDP 500 Answer: C NEW QUESTION 286   Which of the following are features of IPsec transport mode? (Choose three.) A.   IPsec transport mode is used between end stations   B.   IPsec transport mode is used between gateways   C.   IPsec transport mode supports multicast   D.   IPsec transport mode supports unicast   E.   IPsec transport mode encrypts only the payload   F.   IPsec transport mode encrypts the entire packet Answer: ADE   Explanation: IPSec Transport Mode   IPSec Transport mode is used for end-to-end communications, for example, for communication between a client and a server or between a workstation and a gateway (if the gateway is being treated as a host). A good example would be an encrypted Telnet or Remote Desktop session from a workstation to a server.   Transport mode provides the protection of our data, also known as IP Payload, and consists of TCP/UDP header + Data, through an AH or ESP header. The payload is encapsulated by the IPSec headers and trailers. The original IP headers remain intact, except that the IP protocol field is changed to ESP (50) or AH (51), and the original protocol value is saved in the IPsec trailer to be restored when the packet is decrypted.   IPSec transport mode is usually used when another tunneling protocol (like GRE) is used to first encapsulate the IP data packet, then IPSec is used to protect the GRE tunnel packets. IPSec protects the GRE tunnel traffic in transport mode. NEW QUESTION 287   Which command causes a Layer 2 switch interface to operate as a Layer 3 interface? A.   no switchport nonnegotiate   B.   switchport   C.   no switchport mode dynamic auto   D.   no switchport Answer: D NEW QUESTION 288   Which command verifies phase 1 of an IPsec VPN on a Cisco router? A.   show crypto map   B.   show crypto ipsec sa   C.   show crypto isakmp sa   D.   show crypto engine connection active Answer: C   Explanation: show crypto ipsec sa verifies Phase 2 of the tunnel. NEW QUESTION 289   What is the purpose of a honeypot IPS? A.   To create customized policies   B.   To detect unknown attacks

C.   To normalize streams   D.   To collect information about attacks Answer: D NEW QUESTION 290   Which type of firewall can act on the behalf of the end device? A.   Stateful packet B.   Application   C.   Packet   D.   Proxy Answer: D NEW QUESTION 291   ......
