[Pass Ensure VCE Dumps New PassLeader 283q 70-646 Practice Test Guarantee 100 Percent Exam Pass (151-170)

100% Pass Ensure 70-646 Exam Dumps: PassLeader provides the newest 70-646 dumps updated in recent days with total 283q exam questions, it is the best study materials for preparing 70-646 certification exams. PassLeader's 70-646 exam questions will offer you the latest questions and answers with free VCE and PDF file to download, which will help you 100% passing 70-646 exam. And PassLeader also supply the newest free version VCE Player now! keywords: 70-646 exam,283q 70-646 exam dumps,283q 70-646 exam questions,70-646 pdf dumps,70-646 vce dumps,70-646 practice test,70-646 study guide,Pro: Windows Server 2008, Server Administrator Exam

Testlet: City Power & Light   QUESTION 151   You need to recommend a solution for the file servers that meets the company's technical requirements. What should you include in the recommendation? A.   Storage Manager for SANs B.   Network Load Balancing (NLB)   C.   TCP/IP offload services D.   the Multipath I/O feature   Answer: D Testlet: City Power & Light   QUESTION 152   You need to recommend a solution for the new VMs that supports the company's planned changes. What should you recommend doing before the new VMs are deployed? A.   Purchase one additional Enterprise license.   B.   Purchase two additional Enterprise licenses.   C.   Deploy an additional physical server that runs Microsoft HyperV Server 2008 R2.   D.   Deploy an additional physical server that runs Windows Server 2008 R2 Enterprise. Answer: A Testlet: City Power & Light   QUESTION 153   You need to recommend a solution for managing the GPOs that supports the company's planned changes. What should you include in the recommendation? A.   Group Policy Management Console (GPMC) and Authorization Manager   B.   Group Policy Management Console (GPMC) and Microsoft SharePoint Foundation 2010   C.   Microsoft Desktop Optimization Pack (MDOP) D.   Microsoft System Center Configuration Manager Answer: C Testlet: City Power & Light   QUESTION 154   You need to recommend a security solution for the documents in the finance department. The solution must meet the company's security requirements. What should you include in the recommendation? A.   accessbased enumeration (ABE) and Encrypted File System (EFS)   B.   accessbased enumeration (ABE) and Windows BitLocker Drive Encryption (BitLocker)   C.   Active Directory Rights Management Services (AD RMS) D.   File Server Resource Manager (FSRM) file screens Answer: C Testlet: City Power & Light QUESTION 155   You need to recommend a delegation solution for CA1 that meets the company's security requirements. What should you include in the recommendation? A.   accessbased enumeration (ABE)   B.   Active Directory delegation   C.   Authorization Manager   D.   role separation Answer: D Testlet: City Power & Light   QUESTION 156   You need to recommend a deployment solution for Office 2010 to address the problem statements. What should you include in the recommendation? A.   Microsoft Application Virtualization (App-V)   B.   Microsoft Enterprise Desktop Virtualization (MED-V) C.   Microsoft HyperV Server 2008 R2   D.   Windows XP Mode Answer: A Testlet: City Power & Light   QUESTION 157   You need to recommend an automated deployment solution for the new servers in the finance department. What should you include in the recommendation? A.   Microsoft Hyper-V Server 2008 R2 B.   Microsoft System Center Virtual Machine Manager (VMM)   C.   Windows Deployment Services (WDS)   D.   Windows Server Migration Tools Answer: C Testlet: City Power & Light QUESTION 158   You need to recommend a backup solution for the file servers that supports the company's planned changes. What should you include in the recommendation? A.   File Server Resource Manager (FSRM) B.   Microsoft System Center Data Protection Manager   C.   Windows Server Backup D.   Windows Storage Server 2008 Answer: B Testlet: City Power & Light   QUESTION 159   You need to deploy a WSUS server in the branch office that meets the company's technical requirements. What should you deploy?

A.   an autonomous WSUS server that is configured to download updates from Microsoft Update
B.   an autonomous WSUS server that is configured to download updates from the WSUS server in the main office   C.   a WSUS server running in replica mode that is configured to download updates from Microsoft Update   D.   a WSUS server running in replica mode that is configured to download updates from the WSUS server   in the main office Answer: D Testlet: City Power & Light   QUESTION 160   You need to recommend a document management solution that supports the company's planned changes. What should you include in the recommendation?
A.   Active Directory Rights Management Services (AD RMS) and File Server Resource Manager (FSRM)
B.   Active Directory Rights Management Services (AD RMS) and Microsoft SharePoint Foundation
C.   Authorization Manager and Microsoft SharePoint Foundation 2010   D.   File Server Resource Manager (FSRM) and Share and Storage Management Answer: B

Fabrikam Inc

Scenario

COMPANY OVERVIEW

Fabrikam Inc. is a manufacturing company that has a main office and a branch office.

PLANNED CHANGES

You plan to deploy a failover cluster named Cluster1 in the branch office. Cluster1 will be configured to meet th

- The cluster will host eight virtual machines (VMs).
- The cluster will consist of two nodes named Node1 and Node2.
- The quorum mode for the cluster will be set to Node and Disk Majority.
- A user named Admin1 will configure the virtual switch configuration of the VMs.
- The cluster nodes will use shared storage on an iSCSI Storage Area Network (SAN).

You plan to configure a VM named File2 as a file server. Users will store confidential files on File2.

You plan to deploy a Microsoft Forefront Threat Management Gateway (TMG) server in each site. The Forefront

EXISTING ENVIRONMENT

The research department is located in the branch office. Research users frequently travel to the main office.

Existing Active Directory/Directory Services

The network contains a single-domain Active Directory forest named fabrikam.com. The functional level of the f

The relevant organizational units (OUs) for the domain are configured as shown in the following table.

OU name	OU description
Main Office Users	Users in the main office
Main Office Computers	Computers in the main office
Main Office Servers	Servers in the main office
Branch Office Users	Users in the branch office
Branch Office Computers	Computers in the branch office
Branch Office Servers	Servers in the branch office
Domain Controllers	Domain controllers

Fabrikam2 (exhibit):

The relevant sites for the network are configured shown in the following table.

Active Directory site name	Site description
MainOfficeSite	Main office
BranchOfficeSite	Branch office

The relevant group policy objects (GPOs) are configured as shown in the following table.

GPO name	Linked to
Default Domain Policy	Fabrikam.com domain
Default Domain Controllers Policy	Domain Controllers OU
GPO1	Fabrikam.com domain
GPO2	Main Office Computers OU
GPO3	Branch Office Computers OU
GPO4	MainOfficeSite site
GPO5	BranchOfficeSite site

Existing Network Infrastructure   www.passleader.com

All users run Windows Server 2008 R2. The relevant servers are configured as shown in following table.

Server name	Role service	Server site
File1	File Services	MainOfficeSite
DC1	Active Directory Domain Services (AD DS)	MainOfficeSite
DC2	Active Directory Domain Services (AD DS)	MainOfficeSite
WSUS1	Windows Server Update Services (WSUS)	MainOfficeSite
WSUS2	Windows Server Update Services (WSUS)	MainOfficeSite

WSUS2 is configured as a downstream replica server.

File1 contains a share named Templates. Users access the Templates share by using the path \\fabrikam.com\dfs\templates.
File1 has the Distributed File System (DFS) Replication role service and the DFS Namespaces role service installed.

Fabrikam3 (exhibit):

TECHNICAL REQUIREMENTS

- Fabrikam must meet the following requirements:
- Minimize the cost of IT purchases.
- Minimize the potential attack surface on the servers.
- Minimize the number of rights assigned to administrators.
- Minimize the number of updates that must be installed on the servers.
- Ensure that Internet Explorer uses the local ForeFront TMG server to connect to the Internet.
- Ensure that all client computers continue to receive updates from WSUS if a WSUS server fails.
- Prevent unauthorized users from accessing the data stored on the VMs by making offline copies of the VM files.

Fabrikam must meet the following requirements for the Templates share:

- Ensure that users access the files in the Templates share from a server in their local site.
- Ensure that users always use the same UNC path to access the Templates share, regardless of the site in which the users are located.

QUESTION 161   You need to configure Internet Explorer to meet the company's technical requirements. Which GPO or GPOs should you modify? A.   Default Domain Policy   B.   GPO1   C.   GPO2 and GPO3   D.   GPO4 and GPO5 Answer: D Testlet: Fabrikam Inc   QUESTION 162   You need to recommend the minimum number of logical unit numbers (LUNs) that must be provisioned for Cluster1. The recommendation must support the company's planned changes. Which number should you recommend? A.   1 B.   2   C.   8   D.   9 Answer: B Testlet: Fabrikam Inc   QUESTION 163   You need to recommend a strategy for delegating administrative rights to Admin1. The strategy must support the company's planned changes. What should you include in the recommendation? A.   the Authorization Manager snapin on Node1 and Node2   B.   the Authorization Manager snapin on the VMs   C.   the Network Configuration Operators local group on each VM   D.   the Network Configuration Operators local group on Node1 and Node2 Answer: A Testlet: Fabrikam Inc   QUESTION 164   You need to configure Windows Update to meet the company's technical requirements. What should you do? A.   Configure WSUS2 as an autonomous server.   B.   Create a Network Load Balancing (NLB) cluster.   C.   Create multiple Host (A) records and use round robin DNS.   D.   Configure multiple service location (SRV) records and use round robin DNS. Answer: B Testlet: Fabrikam Inc   QUESTION 165   You need to protect the confidential data files on File2 against unauthorized offline access. What should you use? A.   Encrypting File System (EFS) on File2 B.   file screens on Node1 and Node2   C.   NTFS permissions on File2 D.   Windows BitLocker Drive Encryption (BitLocker) on Node1 and Node2 Answer: A Testlet: Fabrikam Inc   QUESTION 166   You need to recommend a file access solution for the Templates share. Which two actions should you recommend? (Each correct answer presents part of the solution. Choose two.) A.   Add File2 as a namespace server for \fabrikam.comdfs.   B.   Add \File2templates as a folder target for \fabrikam.comdfstemplates. C.   In the Group Policy preferences of GPO2 and GPO3, add new mapped drives.   D.   Create a DFS Replication group that contains \File1templates and \File2templates. Answer: BD Testlet: Fabrikam Inc   QUESTION 167   You need to recommend an operating system for Node1 and Node2. The recommendation must meet the company's technical requirements. Which operating system image should you install? A.   a full installation of Windows Server 2008 R2 Enterprise   B.   a full installation of Windows Server 2008 R2 Standard   C.   a Server Core installation of Windows Server 2008 R2 Enterprise   D.   a Server Core installation of Windows Server 2008 R2 Standard Answer: C Testlet: Litware, Inc

Litware, Inc

Scenario

COMPANY OVERVIEW

Litware, Inc. is a manufacturing company that has a main office and two branch office. The main office is located in Montreal. The branch offices are located in Seattle and New York. The main office has 4,000 users. The branch offices each have 500 users.

PLANNED CHANGES

Litware plans to open a new sales office. The sales office will have a direct connection to the Internet. The sales office will have a single server.

The sales office requires a connection to the Montreal office. The connection to the Montreal office must use either TCP port 80 or TCP port 443.

The network currently contains a Fibre Channel Storage Area Network (SAN). A new iSCSI SAN will be implemented during the next month. The current SAN and the new SAN are from different manufacturers. Both SANs use a virtual disk service (VDS) interface.

EXISTING ENVIRONMENT

All servers run Windows Server 2008 R2. All client computers run Windows 7 Enterprise.

The main office has a single DHCP server. The IP addresses for all of the client computers must be assigned from the DHCP server.

All software is installed from a central software distribution point in the main office. Software deployments for the branch offices frequently fail due to bandwidth limitations.

Existing Active Directory/Directory Services

The network contains a single Active Directory domain named litwareinc.com. Each office has two domain controllers.

Current Administration Model

Currently, all help desk users have full administrator rights to the servers. The help desk users use Remote Desktop to log on to the servers and perform tasks such as managing Active Directory user accounts and creating DHCP reservations.

TECHNICAL REQUIREMENTS

Windows Firewall must be managed by using the minimum amount of administrative effort. Windows Firewall configurations must be duplicated easily between servers that have the same server role.

Litware must centralize the monitoring of critical system events. The monitoring solution must use the existing infrastructure.

Litware plans to prevent help desk users from interactively logging on to servers. Help desk users must not have full administrator rights to the servers.

The software deployment process must be updated to meet the following requirements:

- Application source files must be centrally managed.
- Software deployments to the offices in Seattle and New York must remain unaffected if a WAN link fails.

The SANs must be administered by using a single tool.

QUESTION 168   You need to recommend changes to the software deployment process that meet the company's technical requirements. What should you include in the recommendation? A.   BranchCache in Distributed Cache mode B.   BranchCache in Hosted Cache mode   C.   domain-based Distributed File System (DFS)   D.   standalone Distributed File System (DFS) Answer: C Testlet: Litware, Inc   QUESTION 169   You need to recommend a tool to manage the SANs. The tool must support the company's planned changes and technical requirements. Which tool should you recommend? A.   Disk Management   B.   Share and Storage Management   C.   Storage Explorer   D.   Storage Manager for SANs Answer: D Testlet: Litware, Inc   QUESTION 170   You need to recommend a VPN solution for the new sales office. The solution must support the company's planned changes. What should you include in the recommendation? A.   Internet Key Exchange version 2 (IKEv2)   B.   Layer 2 Tunneling Protocol (L2TP)   C.   PointtoPoint Tunneling Protocol (PPTP)   D.   Secure Socket Tunneling Protocol (SSTP) Answer: D
