

[Pass Ensure VCE Dumps PassLeader Free 70-646 PDF Study Guide and VCE Dumps (201-220)]

Where Download The 100% Valid 70-646 Exam Dumps? PassLeader now is offering the newest and valid 283q 70-646 exam questions for preparing 70-646 exam, we ensure our new version 283q 70-646 pdf dumps and vce dumps are 100% valid for passing 70-646 exam, because PassLeader 70-646 PDF dumps and VCE dumps have been updated with the newest 70-646 questions and the 70-646 dumps have been corrected with right questions and answers. Now visit [passleader.com](#) to get the newest 283q 70-646 practice tests with free VCE Player! keywords: 70-646 exam,283q 70-646 exam dumps,283q 70-646 exam questions,70-646 pdf dumps,70-646 vce dumps,70-646 practice test,70-646 study guide,Pro: Windows Server 2008, Server Administrator Exam

Testlet: School of Fine Art QUESTION 201 You need to recommend a solution that meets the company's application provisioning requirements. What should you recommend? A. Create a new MEDV workspace. B. Publish a new RemoteApp program. C. Create an application compatibility shim. D. Package a new application by using the AppV Sequencer. Answer: A Testlet: Blue Yonder Airlines BYA1 (exhibit):

Blue Yonder Airlines
Scenario

COMPANY OVERVIEW

Blue Yonder Airlines has a main office and four branch offices. Each branch office has six satellite offices. The main office is located in Sydney. The branch offices are located in London, New York, Bangkok, and Istanbul. The main office has 1,000 users. Each branch office has 500 users. Each satellite office has 50 to 100 users.

PLANNED CHANGES

Each satellite office will have a single server deployed. The servers will have the following server roles installed:

- File server
- Print server
- Read-only Domain Controller (RODC)

Each satellite office will have a local support technician who performs the following tasks:

- Manages printers.
- Manages server backups.
- Manages updates on the server.

Each support technician will only be permitted to manage the server located in his office.

You plan to implement a backup and recovery solution to restore deleted Active Directory objects. The solution must ensure that the attributes of the deleted objects are restored to the same state they were in before they were deleted.

You plan to deploy a custom sales application named App2 to the portable computers of all company sales consultants. The setup program of App2 requires local administrative privileges. App2 will be updated monthly.

BUSINESS GOALS

Blue Yonder Airlines has the following business goals:

- Minimize server downtime.
- Minimize administrative effort.
- Minimize interruptions to users caused by WAN link failures.

[www.passleader.com](#)

BYA2 (exhibit):

EXISTING ENVIRONMENT

The network contains servers that run either Windows Server 2008 R2 or Windows Server 2008. All client computers were recently replaced with new computers that run Windows 7 Enterprise.

Users do not have local administrator rights on the client computers.

Existing Active Directory/Directory Services

The network contains a single Active Directory domain named blueyonderairlines.com. The functional level of the domain is Windows Server 2008. All domain controllers run Windows Server 2008.

Existing Network Infrastructure

All offices have wired and wireless networks.

The main office has a file server that stores large graphics files. The files are used by all of the users in all of the offices.

A Group Policy is used to assign an application named App1 to all of the users in the domain.

The branch offices contain public computers on which temporary employees can browse the Internet and view electronic brochures. When the employees log on to the public computers, they must all receive the same user settings.

App1 must not be installed on the public computers. The computer accounts for all of the public computers are in an organizational unit (OU) named Public.

REQUIREMENTS

Security Requirements

All computers in the domain must have a domain-level security Group Policy object (GPO) applied.

You plan to implement Network Access Protection (NAP) by using switches and wireless access points (WAPs) as NAP enforcement points.

The public computers must meet the following security requirements:

- Only authorized applications must be run.
- Automatic updates must be enabled and applied automatically.

Users must be denied access to the local hard disk drives and the network shares from the public computers.

[www.passleader.com](#)

BYA3 (exhibit): Technical Requirements

The file server in each branch office is configured as shown in the following table.

Share name	File path
Data	E:\data
Users	E:\users
Apps	E:\apps

Each user is allocated 1 GB of storage on the Users share in their local office.

Each user must be prevented from storing files larger than 500 MB on the Data share in their local office.

Blue Yonder Airlines must meet the following requirements for managing App2:

- Sales consultants must use the latest version of the application.
- When a new version of App2 is installed, the previous version must be uninstalled. Sales consultants must be able to run App2 when they are disconnected from the network.

QUESTION 202 You need to recommend a strategy for recovering objects deleted from Active Directory that supports the planned changes. What should you include in the recommendation? (Each correct answer presents part of the solution. Choose two.)

- A. Active Directory Recycle Bin B. Active Directory snapshots
C. nonauthoritative restores D. tombstone reanimation Answer: BD Testlet: Blue

Yonder Airlines QUESTION 203 You need to recommend a solution for deploying and managing App2. What should you recommend? A. Publish App2 as a RemoteApp program. B. Deploy App2 by using a Group Policy logon script. C. Assign App2 by using Group Policy software distribution.

D. Publish App2 by using Group Policy software distribution. Answer: C Testlet: Blue Yonder Airlines

QUESTION 204 You need to recommend a NAP enforcement method that meets the company's security requirements. Which method should you recommend? A. 802.1X B. DHCP C. IPSec D. VPN Answer: A Testlet: Blue Yonder Airlines

QUESTION 205 You need to recommend a solution for managing the public computers in the branch offices. What should you recommend? A. Create a GPO that is linked to the domain and configure security filtering for the GPO. B. Create a GPO that is linked to the Public OU and configure security filtering for the GPO. C. Create a GPO that is linked to the Public OU and enable loopback processing in the GPO. D. Create a GPO that is linked to the domain and enable

block inheritance on the Public OU. Answer: C Testlet: Blue Yonder Airlines QUESTION 206 You need to recommend an administrative solution for the local support technicians in the satellite offices. The solution must meet the company's security requirements. What should you include in the recommendation? A. Active Directory delegation

B. Administrator Role Separation C. managed service accounts

D. Restricted Groups Answer: B Testlet: Blue Yonder Airlines QUESTION 207 You need to recommend a solution to ensure that users in the London office can access the graphics files in the main office. The solution must meet the company's business goals. What should you recommend? A. Configure the client computers to use BranchCache in Distributed Cache mode. B. Deploy a standalone Distributed File System (DFS) namespace. Configure a DFS Replication group. C. Deploy a domainbased Distributed File System (DFS) namespace. Configure a DFS Replication group. D. Deploy a BranchCache server that operates in Hosted Cache mode. Configure the client computers to use the BranchCache server. Answer: C Testlet: Blue Yonder Airlines

QUESTION 208 You need to implement a solution for the branch office file servers that meets the company's technical requirements. What should you implement on the branch office file servers? A. File Server Resource Manager (FSRM) quotas

B. Network Policy Server (NPS) connection request policies C. NTFS disk quotas

D. Windows System Resource Manager (WSRM) resource allocation policies Answer: A Testlet:

Proseware, Inc Prose1 (exhibit):

Proseware, Inc

Scenario

COMPANY OVERVIEW

Proseware, Inc. is a publishing company that has a main office and a branch office. The main office is located in New York. The branch office is located in Sydney. The main office has 5,000 users. The branch office has 1,000 users.

PLANNED CHANGES

Proseware plans to deploy a new 64-bit application named App2 to 10 users in the branch office. Only members of the local Administrators group can run App2.

Proseware is evaluating whether to deploy virtual desktop pools. The virtual desktop pools must meet the following requirements:

- Apply the settings in GPO1 to the virtual machines (VMs).
- Prevent the VMs from receiving the Automatic Updates settings from GPO2.
- Ensure that only the host VM is affected if a virtual hard disk (VHD) file becomes corrupt.
- Minimize the amount of storage used to support the VMs.
- Minimize the amount of memory and CPU resources used by the VMs.
- Minimize administrative effort.

www.passleader.com

EXISTING ENVIRONMENT

All servers run either Windows Server 2008 or Windows Server 2008 R2. All of the client computers in the main office run Windows 7. All of the client computers in the branch office run Windows XP (x86) with Service Pack 3 (SP3).

All of the client computers in the main office are configured as Microsoft Enterprise Desktop Virtualization (MED-V) and Microsoft Application Virtualization (App-V) clients.

A two-node Hyper-V cluster is deployed in the main office. The cluster uses Clustered Shared Volumes.

Existing Active Directory/Directory Services

The network contains a single Active Directory domain named proseware.com. The functional level of the forest is Windows Server 2008.

The relevant organizational units (OUs) for the domain are configured as shown in the following table.

OU name	OU description
NYC	User accounts and computer accounts in the main office.
SYD	User accounts and computer accounts in the branch office.

Prose2 (exhibit): A custom Group Policy object (GPO) named GPO1 is linked to the domain. GPO1 contains corporate computer security settings.

A custom GPO named GP02 is linked to both office OUs. GP02 contains Windows Server Update Services (WSUS) settings.

Existing Network Infrastructure

Each office has servers that have the following server roles or role services installed:

- WSUS
- Hyper-V
- File Services
- Remote Desktop Web Access (RD Web Access)
- Remote Desktop Session Host (RD Session Host)
- Remote Desktop Virtualization Host (RD Virtualization Host)
- Remote Desktop Connection Broker (RD Connection Broker)

REQUIREMENTS

Technical Requirements

When users interactively logs on to any of the client computers in the branch office, they must automatically receive the local administrator rights to that computer. When users log off, they must lose the administrator rights.

The disk space on all file servers must be monitored. If any file server has less than 20% free disk space on a volume, a script must run that deletes temporary files.

Problem Statements

The main office has a shared folder named Legal. The Legal share is only accessed by users in the legal department. Legal department users report that it takes a long time to locate files in the Legal share by using keyword searches.

www.passleader.com

QUESTION 209 You need to recommend a monitoring solution for the file server that meets the technical requirements. What should you include in the recommendation? A. Data Collector Sets B. File Server Resource Manager quotas C. File Server Resource Manager storage reports D. NTFS disk quotas Answer: A Testlet: Proseware, Inc QUESTION 210 You need to recommend a solution for deploying App2. What should you recommend? A. Deploy a new AppV package that contains App2. Stream the package to the client computers of the 10 users. B. Deploy a new MEDV workspace that contains App2. Deploy the workspace to the client computers of the 10 users. C. On an RD Session Host server in the branch office, install and publish App2 by using RemoteApp. Deploy the RemoteApp program as an MSI file. D. On an RD Virtualization Host server in the branch office, create 10 Windows 7 VMs that contain App2. Configure the new VMs as personal virtual desktops. Answer: D

<http://www.passleader.com/70-646.html> Testlet: Proseware, Inc QUESTION 211 You need to recommend a VHD configuration for the virtual desktop pool VMs. What should you include in the recommendation? A. differencing VHDs B. dynamically expanding VHDs C. fixed-size VHDs D. passthrough disks Answer: B Testlet: Proseware, Inc QUESTION 212 You need to recommend a solution to provision new applications on the VMs for the planned virtual desktop pool deployment. What should you recommend?

A. Deploy the applications to the VMs by using AppV streaming. B. Deploy the applications to the VMs by using Group Policy Software Installation. C. Deploy a MEDV workspace to each VM. Deploy the applications to the workspace. D. Deploy the applications by using RemoteApp. Create a RemoteApp and Desktop Connection for each VM. Answer: D Testlet: Proseware, Inc QUESTION 213 You need to recommend a solution for configuring the Automatic Updates settings on the VMs. What should you include in the recommendation? A. block inheritance B. loopback processing C. security filtering D. WMI filtering Answer: D Testlet: Proseware, Inc QUESTION 214 You need to recommend a solution for managing administrative rights for the branch office client computers. The solution must meet the company's technical requirements. What should you recommend configuring? A. Account Policies by using GPOs B. Local Users and Groups by using Group Policy preferences C. Restricted Groups by using GPOs D. Security Options by using Group Policy preferences Answer: B Testlet: Proseware, Inc QUESTION 215 Users frequently search for documents from the Start menu or in Windows Explorer. You need to recommend a solution to minimize the amount of time it takes for users in the Legal department to locate files stored on the Legal share. What should you include in the recommendation? A. Configure Windows Search Service on the client computers in the Legal department and add the Legal share to the file server library. B. Configure Windows Search Service on the file server and add the Legal share to the file server library. C. Configure Windows Search Service on the file server and add the Legal share to the client computers in the legal department. D. Configure Windows Search Service on the client computers in the Legal department and add the Legal share to the client library. Answer: C Testlet: Trey Research Trey1 (exhibit):

Trey Research
Scenario
COMPANY OVERVIEW
Trey Research is a pharmaceutical company that has a main office in New York and Seattle. The main office has 10,000 users. Each branch office has 500 users.
PLANNED CHANGES
You plan to deploy a new application named Appl. Appl1 is developed by a third party. Users must access Appl1 through document invocation. The users must be able to access the application from any location.
EXISTING ENVIRONMENT
The network contains a single Active Directory domain named trey.com. All servers run Windows Server 2008 R2. All client computers run Windows 7. The network contains a Web server named Web1 that hosts an intranet site. Users report that access to the content on Web1 is slow. You discover that the Microsoft System Center Configuration Manager is used to deploy software to the client computers.
Existing Network Infrastructure
Each office has several file servers. The file servers have a limited number of shares. Users access the data on all of the file servers.
Each branch office has a WAN link to the main office. Users in the branch offices can access the intranet site.
Current Administration Model
All servers are currently administered remotely by using Remote Desktop. The help desk users are members of a global group named Helpdesk. The help desk users are responsible for managing the network infrastructure and the servers.
Trey Research has the following business goals:
Minimize the cost of making changes to the environment.
Minimize the cost of managing the network infrastructure and the servers.

Trey2 (exhibit):

REQUIREMENTS
Technical Requirements
Trey Research plans to Virtualize all of the servers during the next three years. Trey Research must meet the following technical requirements for virtualization:
Simplify the management of all hardware.
Allocate CPU resources between virtual machines (VMs).
Ensure that the VMs can connect to multiple virtual local area networks (VLANs).
Minimize the amount of administrative effort required to convert physical servers to VMs.
Trey Research must ensure that users can access content in the shared folders if a single server fails. The solution must also reduce the amount of bandwidth used to access the shared folders from the branch offices.
Trey Research must meet the following technical requirements for the intranet site:
Improve response time for users.
Provide redundancy if a single server fails.
Security Requirements
A new corporate security policy states that only Enterprise Administrators are allowed to interactively log on to servers.
User Requirements
Users report that it is difficult to locate files in the shared folders across the network. The users want a single point of access for all of the shared folders in the company.

www.passleader.com

QUESTION 216 You need to recommend changes to the intranet site that meet the company's technical requirements. What should you include in the recommendation? A. additional application pools B. additional worker processes C. Failover Clustering D. Network Load Balancing

(NLB) Answer: D Testlet: Trey Research QUESTION 217 You need to recommend a deployment strategy for App1. What should you recommend? A. Assign App1 to users by using a Group Policy. B. Publish App1 to users by using a Group Policy. C. Deploy App1 as a RemoteApp program by using an MSI file. D. Deploy App1 as a RemoteApp program by using an RDP file. Answer: C Testlet: Trey Research QUESTION 218 You are evaluating whether to deploy Hyper-V. Which technical requirement is NOT met by a HyperV deployment? A. Allocate CPU resources between VMs. B. Simplify the management of all hardware. C. Ensure that the VMs can connect to multiple VLANs. D. Minimize the amount of administrative effort required to convert physical servers to VMs. Answer: D Testlet: Trey Research QUESTION 219 You need to identify each help desk user who bypasses the new corporate security policy. What should you do? A. Configure Audit Special Logon and define Special Groups. B. Configure Audit Other Privilege Use Events and define Special Groups. C. Configure Audit Sensitive Privilege Use and configure auditing for the HelpDesk group. D. Configure Audit Object Access and modify the auditing settings for the HelpDesk group. Answer: A Testlet: Trey Research QUESTION 220 You need to identify which tool the help desk users must use to perform administrative tasks. Which tool should you identify? A. RemoteApp B. Remote Assistance C. Remote Desktop D. Remote Server Administration Tools (RSAT) Answer: D
