[New Exam Dumps Valid 160q 70-465 Practice Test with Free PDF Study Guide Download

New Updated 70-465 Exam Questions from PassLeader 70-465 PDF dumps! Welcome to download the newest PassLeader 70-465 VCE dumps: **http://www.passleader.com/70-465.html** (160 Q&As) Keywords: 70-465 exam dumps, 70-465 exam questions, 70-465 VCE dumps, 70-465 PDF dumps, 70-465 practice tests, 70-465 study guide, 70-465 braindumps, Designing Database Solutions for Microsoft SQL Server 2012 Exam **NEW QUESTION 20**   What should you recommend for the updates to Sales.TransactionHistory? A.   a REPEATABLE READ isolation level   B.   implicit transactions   C.   query hints   D.   a SNAPSHOT isolation level   **Answer: A NEW QUESTION 21**   ......   **NEW QUESTION 32**   You need to recommend a solution to back up DB1. What should you include in the recommendation? A.   Azure Table Storage   B.   Azure Queue storage   C.   Azure Blob storage   D.   Azure Document DB   **Answer: C**   Explanation: For SQL Server the Azure Blob Storage service offers a better alternative to the often used tape option to archive backups. Tape storage might require physical transportation to an off-site facility and measures to protect the media. Storing your backups in Azure Blob Storage provides an instant, highly available, and a durable archiving option. https://azure.microsoft.com/en-us/documentation/articles/storage-use-storage-sql-server-backup-restore/ **NEW QUESTION 33** ......   **NEW QUESTION 154**   You are using dynamic management views to monitor an SQL Server server named SQL1. A database administrator named Dba1 must monitor the health of SQL1. You need to ensure that Dba1 can access dynamic management views for SQL1. The solution must use the principle of least privilege. Which permissions should you assign to Dba1? A.   VIEW ANY DEFINITION   B.   VIEW SERVER STATE C.   VIEW DEFINITION   D.   CONTROL SERVER **Answer: B Explanation:**   To query a dynamic management view or function requires SELECT permission on object and VIEW SERVER STATE or VIEW DATABASE STATE permission.   https://msdn.microsoft.com/en-us/library/ms188754.aspx **NEW QUESTION 155**   You have a customer who has several SQL Server 2012 database servers. You are designing a data warehouse for the customer. The data warehouse will use columnstore indexes. The customer identifies that the following must be supported for the column store indexes.   - Data manipulation language (DML) statements   - Nonclustered columnstore indexes   - Clustered columnstore indexes   - Partitioning   You need to identify which technology requires the customer to implement an SQL Server 2014 database. What should you identify? A.   clustered columnstore indexes   B.   nonclustered columnstore indexes   C.   data manipulation language (DML) statements   D.   partitioning   **Answer: A Explanation:**   SQL Server 2014 has the features of SQL Server 2012 plus updateable clustered columnstore indexes. This feature is required here as DML statements must be supported in the warehouse.
https://msdn.microsoft.com/en-us/library/gg492088(v=sql.120).aspx **NEW QUESTION 156**   ...... **NEW QUESTION 157**   Drag and Drop Question   You have an SQL Server 2014 server. You plan to create four stored procedures that will use transactions. The stored procedures will be configured as shown in the following table.

Stored procedure name	Concurrency strategy
SP1	A transaction will only recognize data changes made before the start of the transaction. Other transactions are allowed to modify data.
SP2	A transaction can read data made from another transaction that has not been committed.
SP3	A transaction can only read data made from another transaction that has been committed.
SP4	During a transaction, no other transactions can modify data.

You need to recommend an isolation level for each stored procedure. The solution must support the concurrency strategy of each stored procedure and must minimize locks. What should you recommend? To answer, drag the appropriate isolation levels to the correct stored procedures. Each isolation level may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Isolation Levels

READ COMMITTED

READ UNCOMMITTED

REPEATABLE READ

SERIALIZABLE

SNAPSHOT

Answer Area

SP1: Isolation level

SP2: Isolation level

SP3: Isolation level

SP4: Isolation level

Answer:

Isolation Levels		Answer Area
READ COMMITTED		SP1: SNAPSHOT
READ UNCOMMITTED		SP2: REPEATABLE READ
REPEATABLE READ		SP3: READ COMMITTED
SERIALIZABLE		SP4: SERIALIZABLE
SNAPSHOT
