(Ctrl+End) QUESTION 21 Drag and Drop Question A company is implementing a SharePoint farm that will contain six servers. The farm architecture design must meet the following requirements: - Distribute incoming user requests equally. - Provide high availability. You need to distribute the servers and roles to meet the requirements. How should you distribute the servers and roles? (To answer, drag the appropriate server or role to the correct location or locations in the answer area. Each server or role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Answer:

QUESTION 22 Hotspot Question You are designing the search service topology for a SharePoint farm. The design must meet the following requirements: - Search services must be fault tolerant and highly available. - Search crawls must not affect page

load times. - Search queries must run at the fastest possible speed. You need to distribute the appropriate search service roles to meet the requirements. How should you distribute the service roles? (To answer, select the appropriate service role from each drop-down list in the answer area.)

Answer:

QUESTION 23 Hotspot Question You are managing search results in a SharePoint farm. You need to configure a query rule that fires for all queries. In the Search service application, which option should you select? (To answer, select the appropriate option in the answer area.)

Rule name

Query Matches Keyword Exactly
Query exactly matches one of these phrases (semi-colon separated)

[Remove Condition](#)
[Add Alternate Condition](#)

Promoted Results
[Add Promoted Result](#)
Result Blocks
[Add Result Block](#)
[Change ranked results by changing the query](#)

Answer: Rule name

QUESTION 25 Drag and Drop Question A company has a SharePoint 2013 farm in an Active Directory Domain Services (AD DS) domain. The company uses a third-party application to process payroll data and view payroll reports. The third-party application uses SQL Authentication. Payroll administrators currently use custom credentials to sign in to the payroll application. You have the following requirements: - Payroll administrators must use Microsoft Excel and Excel Services to access payroll data and view reports from within SharePoint. - Payroll administrators must not be required to enter credentials when accessing payroll data. - The Secure Store must be configured for high security and high process isolation. You need to configure the Secure Store to meet the requirements. Which four actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

	Answer Area
Generate a new key for your Secure Store service application.	
Configure the site collection administrator account in SharePoint Server to run the Secure Store application pool.	
Store credentials in Secure Store by using a Secure Store target application.	
Create a Secure Store service application instance, and start the Secure Store service on servers within the farm.	
Register a managed account to run the Secure Store application pool.

QUESTION 26 Drag and Drop Question A company has a SharePoint 2013 farm. The company is in the process of configuring eDiscovery for Microsoft Exchange Server 2013 and has installed the Microsoft Exchange Web Services Managed API on each front-end web server. You need to configure a trust relationship between the Exchange server and the SharePoint farm. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Answer Area

- Run the **Set-FrontendTransportServer** Windows PowerShell cmdlet on the Exchange server.
- Run the **New-MailboxSearch** Windows PowerShell cmdlet on the Exchange server.
- Configure the SharePoint web application that processes incoming server-to-server requests to use SSL.
- Configure the SharePoint farm to trust the Exchange server.
- Configure IIS on the front-end web servers to trust incoming connections from the Exchange server.
- Configure the Exchange server to trust the SharePoint farm.

www.passleader.com

Answer:

Answer Area

- Run the **Set-FrontendTransportServer** Windows PowerShell cmdlet on the Exchange server.
- Run the **New-MailboxSearch** Windows PowerShell cmdlet on the Exchange server.
- Configure IIS on the front-end web servers to trust incoming connections from the Exchange server.
- Configure the SharePoint farm to trust the Exchange server.
- Configure the SharePoint web application that processes incoming server-to-server requests to use SSL.
- Configure the Exchange server to trust the SharePoint farm.

QUESTION 27 Hotspot Question You upgrade a SharePoint 2010 environment to SharePoint 2013. The new environment includes the following site collections.

URL	Content Database
http://intranet.contoso.com	WSS_Content
http://extranet.contoso.com	WSS_Extranet

All site collections are backward compatible with SharePoint 2010. You are preparing to allow site owners to upgrade sites to SharePoint 2013 compatibility mode. You need to limit the number of sites that can be upgraded concurrently to five or fewer. Which Windows PowerShell cmdlets should you run? (To answer, select the appropriate cmdlet from each drop-down list in the answer area.)

```
$var = Get-SPWebApplication http://intranet.contoso.com
$var = Get-SPWebApplication WSS_Content
$var = Set-SPContentDatabase http://intranet.contoso.com
$var = Set-SPContentDatabase WSS_Content
```

```
$var.SiteUpgradeThrottleSettings.UsageStorageLimit = 5
$var.ConcurrentSiteUpgradeSessionLimit = 5
$var.EnableThrottling = 5
$var.ThrottleSettings = 5
```

Answer:

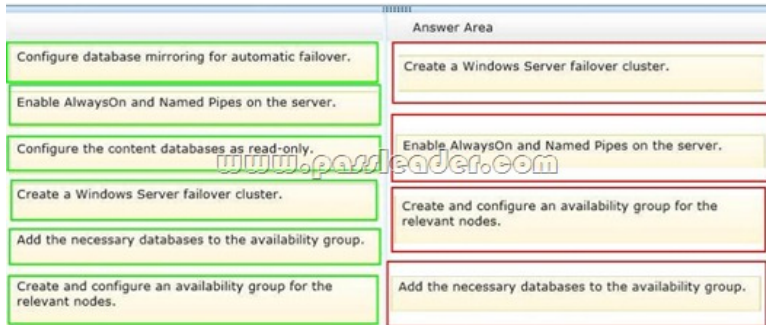

```
$var = Get-SPWebApplication http://intranet.contoso.com
$var = Get-SPWebApplication WSS_Content
$var = Set-SPContentDatabase http://intranet.contoso.com
$var = Set-SPContentDatabase WSS_Content

$var.SiteUpgradeThrottleSettings.UsageStorageLimit = 5
$var.ConcurrentSiteUpgradeSessionLimit = 5
$var.EnableThrottling = 5
$var.ThrottleSettings = 5
```

QUESTION 28 Drag and Drop Question You provision and configure a new SharePoint farm. The content databases are stored in Microsoft SQL Server 2012. You need to configure the databases for high availability. Which four actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

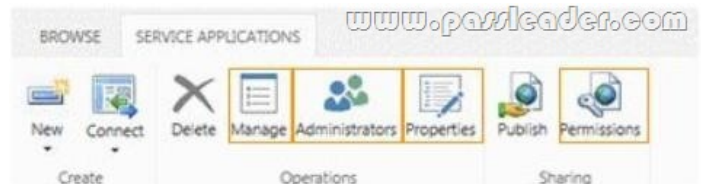

Answer:

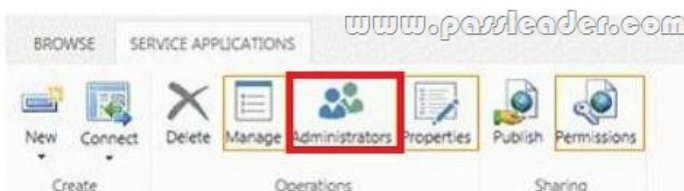

QUESTION 29 You need to ensure that users can install apps from the App Catalog. Which permission or permissions should you grant to the users? A. Use Client Integration Features B. Manage Web Site and Create Subsites C. Use Self-Service Site Creation D. Add and Customize Pages

Answer: B **QUESTION 30** Hotspot Question An organization has an Active Directory Domain Services (AD DS) domain that includes a security group named SPAdmins. Employees use SharePoint to connect to external business systems. In Central Administration, you select Manage Service Applications. You need to configure the Secure Store service application to ensure that members of the SPAdmins group can create new Secure Store target applications. Which button should you click to begin the process? (To answer, select the appropriate button in the answer area.)

Answer:

QUESTION 31 Members of the Sales team store Microsoft Excel workbooks and other files on a SharePoint team site. The workbooks do not access external data. When Sales team members attempt to open workbooks from the team site, they receive an error message stating that the workbook cannot be opened. You need to configure the SharePoint farm to ensure that users can open Excel workbooks. What should you do? A. Set Trusted File Locations for Excel Services.

B. Add members to a Secure Store target application. C. Set the Excel Calculation Services authentication method to Impersonation. D. Grant members Read permission to the Sales team site. Answer: A **QUESTION 32** Drag and Drop Question You are deploying a SharePoint farm. You need to prevent all users

from purchasing or installing apps from the SharePoint store. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

In Central Administration, on the Apps page, SharePoint and Office Store section, click **App Requests**.

Sign in as a site collection administrator.

Set the value of the **Status** property to **Declined**.

In Central Administration, on the Apps page, SharePoint and Office Store section, click **Configure Store Settings**.

Set the value of **Should end users be able to get apps from the SharePoint Store?** to **No**.

Sign in as a farm administrator.

Answer:

	Answer Area
In Central Administration, on the Apps page, in the SharePoint and Office Store section, click App Requests .	Sign in as a farm administrator.
Sign in as a site collection administrator.	In Central Administration, on the Apps page, in the SharePoint and Office Store section, click Configure Store Settings .
Set the value of the Status property to Declined .	Set the value of Should end users be able to get apps from the SharePoint Store? to No .
In Central Administration, on the Apps page, in the SharePoint and Office Store section, click Configure Store Settings .	Sign in as a farm administrator.
Set the value of Should end users be able to get apps from the SharePoint Store? to No .	
Sign in as a farm administrator.	

QUESTION 33 A company has an Active Directory Domain Services domain that contains a SharePoint farm. The farm contains a site collection that displays data from an employee information database. You define a domain user account named HRUsers and configure the account to have read-only permissions to the database. You have the following data access requirements for the employee information database: - Members of the Human Resources department must be able to view data by using SharePoint, without entering database credentials. - No other SharePoint users should be able to view the employee data. You need to meet the requirements. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

- A. Enable the Reports and Data Search Support site collection feature.
- B. Create an external list that displays data from the employee information database.
- C. In the Secure Store service application, define a target application by using a group mapping.
- D. Enable site collection reporting.
- E. In the Secure Store service application, define a target application by using an individual mapping.

Answer: AC QUESTION 34 You are configuring a SharePoint environment to support workflows. Workflows must meet the following requirements: - Display a visual representation of the workflow. - Display the workflow history. - Provide access to external lists. You need to implement the necessary shared services. Which shared services should you implement? (Each correct answer presents part of the solution. Choose two.)

- A. Business Data Connectivity Services
- B. Workflow Services
- C. Access Services
- D. Word Automation Services
- E. Visio Graphics Services

Answer: BE QUESTION 35 A Sales team creates proposals by using Microsoft Word. Sales team members store and review the proposal documents in the Sales team site collection. New proposals are uploaded to the team site for approval. You need to ensure that approved proposals are automatically converted to PDF format and then routed to a records center site collection. Which two features should you implement? (Each correct answer presents part of the solution. Choose two.)

- A. Send To Connections
- B. Content deployment
- C. Document Conversion Service
- D. Machine Translation Service
- E. Word Automation Services

Answer: AE QUESTION 36 A company has two SharePoint farms as described in the following table.

Name	URL
HRFarm	https://hrweb.tailspintoys.com
FinanceFarm	https://finweb.tailspintoys.com

You need to process incoming server requests on HRFarm that originate from FinanceFarm. What should you do? (Each correct answer presents part of the solution. Choose all that apply.) A. Configure both farms to use Secure Sockets Layer (SSL) connections. B. Run the Windows PowerShell cmdlet New-SPTrustedSecurityTokenIssuer on a server in FinanceFarm. C. Run the Windows PowerShell cmdlet New-SPTrustedSecurityTokenIssuer on a server in HRFarm. D. Log on as a member of the Administrators group on a server in HRFarm. E. Run the Windows PowerShell cmdlet Get-SPTrustedSecurityTokenIssuer -Identity FarmA on a server. in HRFarm. Answer: ACD

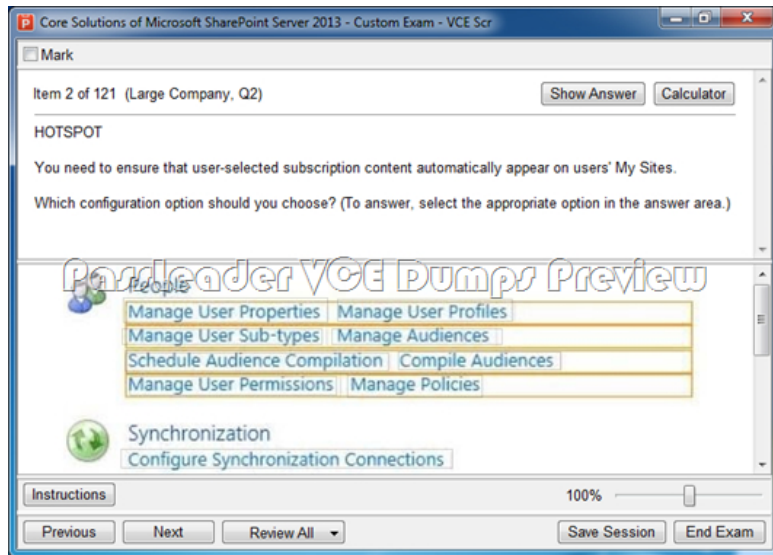

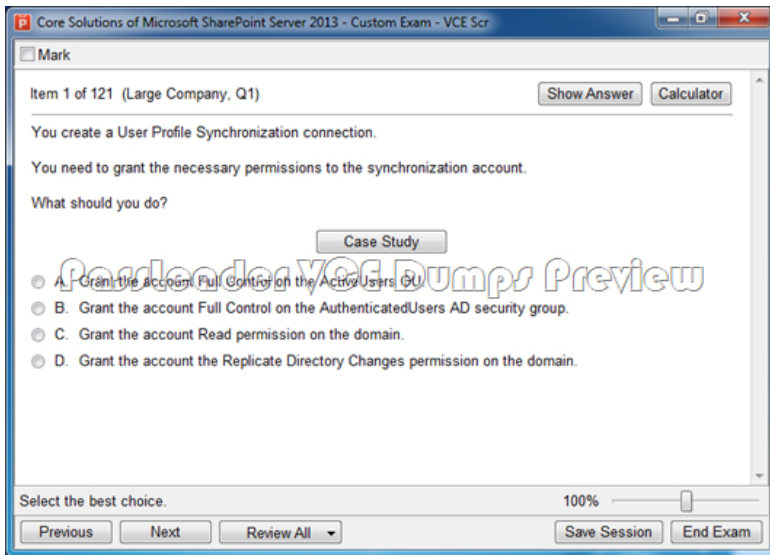

QUESTION 37 You are migrating a SharePoint Server 2010 My Site site collection to SharePoint Server 2013 by using the database attach method. You copy the content databases to the SharePoint 2013 farm. You need to verify that all required objects have been successfully added to the SharePoint 2013 farm before upgrading the content database. What should you do? A. In the SharePoint 2013 site collection, run the site collection health checks. B. Run the Windows PowerShell cmdlet Test-SPContentDatabase on the SharePoint 2013 farm. C. Run the Windows PowerShell cmdlet Test-SPContentDatabase on the SharePoint 2010 farm. D. In the SharePoint 2010 site collection, run the site collection health checks. E. Run the Windows PowerShell cmdlet Mount-SPContentDatabase on the SharePoint 2010 farm. F. Run the Windows PowerShell cmdlet Mount-SPContentDatabase on the SharePoint 2013 farm. Answer: B

QUESTION 38 You are a SharePoint administrator at Litware, Inc. Excel Services is not currently able to load workbooks on the SharePoint site. The Unified Logging Service (ULS) log contains the following error message: System.Data.SqlClient.SqlException: Cannot open database "WSS_Content_Portal_Content_Database" requested by the login. The login failed. Login failed for user 'LITWAREsvcExcelService'. You need to grant only the minimum necessary permissions to the Excel Services account to ensure that users can open Excel workbooks from within a browser window. Which Windows PowerShell cmdlet or cmdlets should you run? A. \$sa = Get-SPServiceApplication | where {\$_.TypeName -eq "Excel Services Application Web Service Application"} and \$sa.GrantContentDatabasePermissions("WSS_Content_Portal_Content_Database") B. Add SPSHellAdmin -UserName LITWAREsvcExcelService C. Add SPSHellAdmin -UserName LITWAREsvcExcelService -database WSS_Content_Portal_Content_Database D. \$wa = Get-SPWebApplication https://portal.litware.com and \$wa.GrantToProcessIdentity("LITWARE svcExcelService") Answer: D

QUESTION 39 A SharePoint environment contains an instance of Microsoft SQL Server 2008 R2. You plan to migrate data from the existing database to a new instance of SQL Server 2012. You need to configure SQL Server to support the migration. You must accomplish this goal without requiring any SharePoint application configuration changes. What should you do? A. On the SQL Server, configure a named instance. B. On all servers in the farm, configure a SQL Server alias. C. On all servers in the farm, configure SQL Server database mirroring. D. Create a single-node SQL Server cluster. Answer: B

QUESTION 40 A company plans to use eDiscovery in SharePoint. The environment includes Microsoft Lync Server 2013 and Microsoft Exchange Server 2013. Lync Server is configured to archive conversations to Exchange Server. You configure Exchange Server for eDiscovery. You need to complete the eDiscovery configuration. What should you do? (Each correct answer presents part of the solution. Choose all that apply.) A. Configure a trust relationship between SharePoint Server and Lync Server. B. Create a SharePoint connector in the Exchange Server management shell. C. Install the SharePoint Web Services API on every server that runs Exchange Server. D. Configure a trust relationship between SharePoint Server and Exchange Server. E. Install the Exchange Web Services API on every SharePoint front-end web server. F. Create an Exchange eDiscovery service application in Central Administration. Answer: DE
