Welcome to download the newest PassLeader 70-243 VCE dumps: <http://www.passleader.com/70-243.html> (154 Q&As) Keywords: 70-243 exam dumps, 70-243 exam questions, 70-243 VCE dumps, 70-243 PDF dumps, 70-243 practice tests, 70-243 study guide, 70-243 braindumps, Administering and Deploying System Center 2012 Configuration Manager Exam

NEW QUESTION 1 You create a new Active Directory user named User1. You create a new collection that contains the servers in PS1 and PS2. You need to ensure that User1 can perform the following tasks in SP1 and SP2: - Modify alerts - Set maintenance windows - Deploy application to servers The solution must minimize the number of permissions assigned to User1. What should you do? A. Add User1 as an administrative user. Assign the Full Administrator security role to User1. Remove the Default security scopes of the type Collection from User1. Add the new Collection to the scope of User1. B. Add User1 as an administrative user. Assign the Full Administrator security role to User1. Remove all of the Collection scopes from User1. Add the new Collection to the scope of User1. C. Add User1 as an administrative user. Assign the infrastructure security role to User1. Remove the Default security scopes of the type Collection from User1. Add the new Collection to the scope of User1. D. Add User1 as an administrative user. Assign Application Administrator security role to User1. Remove all of the Collection scopes from User1. Add the new Collection to the scope of User1. **Answer: D**

NEW QUESTION 2 You have a system Centre 2012 R2 Configuration Manager Service Pack1 (SP1) stand-alone primary site that includes the servers configured as the following: -- Server name: Configuration -- Server1: Configuration Manager primary site server -- Server2: Microsoft SQL server 2012 SQL server reporting services (SSRS) reporting services point You have a custom report named Report1. Report1 has one parameter that has default value. You need to ensure that users can run Report1. But they cannot modify the default value of the parameter. What should you do? A. Upload a report model file to the report by using SSRS B. Edit report by using the report Builder C. Edit the report by using Business Intelligence Development Studio D. Edit security of the report by using SSRS **Answer: D**

NEW QUESTION 3 You have a system Centre 2012 R2 Configuration Manager Service Pack1 (SP1) site. You use Configuration manager to manage client computers and servers. You need to ensure that client computer administrator can manage only client computers, and server administrators can manage only servers. The solution must ensure that objects created by the client computers administrator are not visible to the server administrators. Which three actions should you perform before you add the administrator as configuration manager administrators? A. Create a custom security role for the client computers and a custom security role for the servers B. Add client computers administrators and the server administrators to the Domain group C. Create a unique security scope for the client computer objects and a unique security scope for the server objects D. Set the security scopes for the client computer objects and the server objects E. Create a collection for the client computers and a collection for the servers **Answer: A**

NEW QUESTION 4 You create a domain user named User1. The domain user are member of the local groups on each client computer as described in the following: -- User: Local Group -- User1: Users -- User2: Administrators -- User3: Power Users -- User4: WinRMRemoteWMIUsers_ -- User5: Remote Management Users You plan to configure client Push installation. You need to configure the client push installation account. The solution must use the principle of least privilege. What should you do? A. Configure User3 as the client Push installation account B. Specify User5 as the manager of the Clients OU, and then configure User5 as the client push installation account C. Add User1 to the Client Admins group, and then configure User1 as the client push installation account D. Configure User1 as the client push installation account **Answer: C**

NEW QUESTION 5 Drag and Drop Question Your network contains a system Centre 2012 R2 Configuration Manager Service Pack1 (SP1) environment. Your company currently does not manage software updates. The company plans to use Configuration Manager to deploy updates to 600 client computers that run windows 8.1 Pro and 3000 client computers that run windows 8.1 Enterprise. You need to deploy updates to the client computers by using Configuration Manager. Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer: Scan all of the client computers - 3 Configure a software update point - 4 Synchronize software updates - 2 Create a software updates deployment - 5 Run the setup for windows server update services (WSUS) - 1 **NEW QUESTION 6** Your company has a main office and a remote office. The main office has 3,000 users. The remote office has 600 users. You deploy System Center 2012 R2 Configuration Manager Service Pack 1 (SP1) at the main office. You need to ensure that users at the remote office can use Configuration Manager to start bare metal installations of operating systems over the network. The solution must minimize the number of services deployed at the remote office. Which two features should you deploy at the remote office? Each correct answer presents part of the solution. A. a state migration point B. a server locator point C. a PXE-enabled distribution point IS D. a management point E. Windows Deployment Services (WDS) **Answer: CD** **NEW QUESTION 7** Hotspot Question You have a system Center 2012 R2 Configuration Manager Service Pack1 (SP1) deployment that contains the servers configured as shown in the following:

Server1	Primary site server
Server2	Management point
Server3	Distribution point
Server4	Enrollment point
Server5	Software update point
Server6	Out of band service point

You plan to deploy client computers by using the operating system deployment feature. You need to configure the environment to ensure that operating system can be deployed by using operating system deployment. What should you do? Select the appropriate options.

Answer: Server 3 and open ports: 67, 68, 69 and 4011 **NEW QUESTION 8** You manage a system Centre 2012 R2 Configuration Manager Service Pack1 (SP1) stand-alone primary site that includes the servers configured as shown in the following table:

Server name	Configuration
Server1	Primary site server
Server2	Microsoft SQL Server Reporting Services (SSRS)
Server3	Microsoft SQL Server

You need to provide a user named User1 with the ability to run reports. What should you do? A. On Server2, modify the permission of the reporting services folder by using Report Manager. B. On Server2, modify the Configuration Report Users security role by using Report Managers. C. On Server3, modify the database permission by using SQL server Management Studio. D. On Server1, assign user1 a security role by using the Configuration Manager Console. **Answer: D** **NEW QUESTION 9** ??
