

[2016-NEW! Download PassLeader Free 229q 70-413 Braindump in VCE and PDF (Question 1 & Question 20)]

Preparing for 70-413 exam with valid 70-413 exam dumps, trying PassLeader's 70-413 VCE dumps or 70-413 PDF dumps, our 70-413 exam dumps contain all the real exam questions, all new 70-413 exam questions are available in PassLeader's 70-413 braindumps. Our 229q 70-413 premium vce file is the best study guide for preparing for 70-413 exam, browsing PassLeader's website and download 229q 70-413 exam questions. keywords: 70-413 exam, 229q 70-413 exam dumps, 229q 70-413 exam questions, 70-413 pdf dumps, 70-413 practice test, 70-413 vce dumps, 70-413 study guide, 70-413 braindumps, Designing and Implementing a Server Infrastructure Exam P.S. Download Free 70-413 PDF Dumps and Preview PassLeader 70-413 VCE Dumps At The End Of This Post!!! (Ctrl+End) **QUESTION 1** Your company has a remote office that contains 1,600 client computers on a single subnet. You need to select a subnet mask for the network that will support all of the client computers. The solution must minimize the number of unused addresses. Which subnet mask should you select? A. 255.255.248.0 B. 255.255.252.0 C. 255.255.254.0 D. 255.255.240.0 Answer: A **Case Study 1 - Proseware, Inc. (Question 2 - Question 10)** **Overview** General Overview Proseware, Inc. is a pharmaceutical services company that has a sales department, a marketing department, an operations department, and a human resources department. **Physical Locations** Proseware has two main offices. One of the offices is located in New York. The other office is located in Chicago. The New York office uses a 172.16.1.0/24 network ID. The Chicago office uses a 192.168.1.0/24 network ID. The offices connect to each other by using a high-bandwidth, low-latency WAN link. Each office connects directly to the Internet. **Existing Environment** The network contains an Active Directory forest named proseware.com. The forest contains two domains named proseware.com and chicago.proseware.com. All of the user accounts and the computer accounts in the New York office reside in the proseware.com domain. All of the user accounts and the computer accounts in the Chicago office reside in the chicago.proseware.com domain. All DNS zones are Active-Directory-integrated. Each office is configured as an Active Directory site. The network ID for each office is associated to the appropriate site. Each office contains two domain controllers. The domain controllers were recently upgraded from Windows Server 2008 R2 to Windows Server 2012 R2. The functional level of the domain and the forest is Windows Server 2003. The company uses Active Directory user attributes to store the personal information of its employees in custom attributes. **Existing Servers** The relevant servers are configured as shown in the following table.

Server name
DC01
DC02
WDS01
Host01
Host02
Host03
RAS01
File01
DC03
DC04
Host04
Host05
Host06
RAS02
File02

All servers run Windows Server 2012 R2. DC01 has an IPv4 scope. The starting IP address in the range is 172.16.1.100 and the ending address is 172.16.1.199. DC03 has an IPv6 scope. The starting IP address in the range is 192.168.1.100 and the ending IP address is 192.168.1.199. There are no exclusion ranges configured on DC01 or DC03. **Requirements** **Planned Changes** Proseware plans to implement the following changes: - Deploy a read-only domain controller (RODC) to the London office. - Give users remote access to both offices by using a VPN connection from their laptop or tablet. - If DC01 fails, ensure that the

computers in the New York office can receive IP addresses within 30 minutes. - In the New York site, deploy two 50-TB, Fibre Channel SAN disk arrays. Offloaded Data Transfer (ODX) will be used on both storage arrays. The Hyper-V hosts will use the new SANs for virtual machine storage. - Open three additional offices in Montreal, Atlanta, and London. The offices will connect to each other by using a high-bandwidth, low-latency WAN link. Each office will connect directly to the Internet. - For legal reasons, the Montreal site will have its own forest named montreal.proseware.com. - The Montreal and Atlanta offices will have local IT administrators to manage the network infrastructure of their respective office. The London office will not have a local IT staff. Each office will have approximately 50 client computers. Technical Requirements Proseware identifies the following technical requirements: - Users in the Montreal office must only be allowed to access shares that are located on File01 and File02. The Montreal users must be prevented from accessing any other servers in the proseware.com forest regardless of the permissions on the resources. - Users in the New York office must be able to reconnect to the remote access VPN servers automatically. Users in the Chicago office must use SSL to connect to the remote access VPN servers. - Domain controllers that run Windows Server 2012 R2 and Windows Server 2008 R2 must be able to be deployed to the proseware.com domain. Administrators in the New York office must be able to restore objects from the Active Directory Recycle Bin. - The DNS servers must be prevented from overwriting the existing DNS entries that have been stored in cache. - Each DNS server must be managed by an administrator from the same office as the DNS server. - The required time to create new fixed virtual hard disks (VHDs) on the SANs must be minimized. - The remote access servers must be able to restrict outgoing traffic based on IP addresses. - All certificates must be deployed to all of the client computers by using auto-enrollment. - All of the DHCP Server server roles must be installed on a domain controller. - Only one DHCP server in each site must lease IP addresses at any given time. - DHCP traffic must not cross site boundaries. - RODCs must not contain personal user information. QUESTION 2 You need to recommend a trust model. What should you include in the recommendation? A. A one-way, forest trust that has selective authentication. B. A one-way, external trust. C. A two-way, external trust. D. A one-way, forest trust that has domain-wide authentication. Answer: A QUESTION 3 Hotspot Question You need to recommend a configuration for the DHCP infrastructure. What should you recommend? To answer, select the appropriate options in the answer area. Answer Area

Server on which to deploy the DHCP Server server role:

▼
DC02
DC04
RAS01
RAS02

DHCP failover mode:

▼
Hot standby
Load-balanced

DHCP failover setting to configure:

▼
Load percentage
Reserve percentage
State switchover interval

QUESTION 6 You need to recommend a deployment method for Proseware. What is the best approach to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer. A. a WDS Deployment server and Multicast transmissions B. a WDS Deployment server and Unicast transmissions C. a WDS Transport server and Multicast transmissions D. a WDS Transport server and Unicast transmissions Answer: A

QUESTION 7 You need to recommend a solution for the remote access servers. What should you include in the recommendation? A. Network address translation (NAT) B. Logging levels C. Packet filtering D. Packet tracing Answer: C

QUESTION 8 Drag and Drop Question You need to recommend changes for the Active Directory infrastructure. What should you recommend? To answer, drag the appropriate domain and forest functional levels for proseware.com to the correct locations. Each functional level may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Functional Levels

Windows Server 2008
Windows Server 2008 R2
Windows Server 2012
Windows Server 2012 R2

Answer Area

Domain functional level for proseware.com: Functional level

Forest functional level for proseware.com: Functional level

www.passleader.com

Answer: **Functional Levels**

Windows Server 2008
Windows Server 2008 R2
Windows Server 2012
Windows Server 2012 R2

Answer Area

Domain functional level for proseware.com: Windows Server 2008 R2

Forest functional level for proseware.com: Windows Server 2008 R2

QUESTION 9 You run the Get-DNSServercmdlet on DC01 and receive the following output:

=====

```
IsReverseLookupZone False
IsDsIntegrated True
IsReadOnly False
MaxNegativeTtl 00:15:00
ZoneName .
MaxTtl 1.00:00:00
StoreEmptyAuthenticationResponse True
ZoneType Cache
IsPaused False
IsShutdown False
DistinguishedName DC=RootDNSServers,cn=MicrosoftDNS,DC=...
EnablePollutionProtection True
LockingPercent 50
MaxKbSize 0
IsAutoCreated False
```

You need to identify which tools must be used to perform the migration. Which tools should you identify? A. Active Directory Migration Tool version 3.2 (ADMT v3.2) and Group Policy Management Console (GPMC)
B. Active Directory Federation Services (AD FS) and Microsoft Federation Gateway
C. Active Directory Migration Tool version 3.2 (ADMT v3.2) and Active Directory Federation Services (AD FS)
D. Active Directory Lightweight Directory Services (AD LDS) and Group Policy Management Console (GPMC) Answer: A QUESTION 12 You need to recommend a management solution for the GPOs. The solution must meet the technical requirements. What should you include in the recommendation? A. Microsoft Desktop Optimization Pack (MDOP)
B. Microsoft System Center 2012 Operations Manager
C. Microsoft System Center 2012 Data Protection Manager (DPM)
D. Microsoft Baseline Security Analyzer (MBSA) Answer: A QUESTION 13 You need to recommend a solution for DHCP logging. The solution must meet the technical requirement. What should you include in the recommendation? A. Event subscriptions
B. IP Address Management (IPAM)
C. DHCP audit logging
D. DHCP filtering Answer: B QUESTION 14 You are evaluating the implementation of data deduplication on the planned Windows Server 2012 file servers. The planned servers will have the identical disk configurations as the current servers. You need to identify which volumes can be enabled for data deduplication. Which volumes should you identify? (Each correct answer presents part of the solution. Choose all that apply.) A. C
B. D
C. E
D. The CSV
E. DATA Answer: CE QUESTION 15 You need to recommend which changes must be implemented to the network before you can deploy the new web application. What should you include in the recommendation? A. Upgrade the DNS servers to Windows Server 2012.
B. Upgrade the domain controllers to Windows Server 2012.
C. Change the forest functional level to Windows Server 2008 R2.
D. Change the functional level of both the domains to Windows Server 2008 R2. Answer: B QUESTION 16 You need to recommend changes to the DNS environment that support the implementation of the sales.contoso.com domain. The solution must ensure that the users in all of the domains can resolve both Internet names and the names of the servers in all of the internal domains. What should you recommend? A. On the DNS servers in contoso.com, create a zone delegation in the contoso.com zone. On the DNS servers in sales.contoso.com, add a forwarder to the contoso.com DNS servers.
B. On the DNS servers in contoso.com, configure a reverse lookup zone. On the DNS servers in sales.contoso.com, configure a conditional forwarder to contoso.com.
C. On the DNS servers in contoso.com, configure a conditional forwarder to sales.contoso.com. On the DNS servers in sales.contoso.com, configure a reverse zone.
D. On the DNS servers in contoso.com, add a conditional forwarder to the sales.contoso.com zone.
E. On the DNS servers in sales.contoso.com, add a forwarder to the DNS servers of the company's ISP. Answer: A QUESTION 17 You are planning the implementation of two new servers that will be configured as RADIUS servers. You need to recommend which configuration must be performed on the VPN servers. The solution must meet the technical requirements. What should you do on each VPN server? A. Install the Health Registration Authority role service.
B. Add a RADIUS client.
C. Enable DirectAccess.
D. Modify the authentication provider. Answer: D QUESTION 18 After the planned upgrade to Windows Server 2012, you restore a user account from the Active Directory Recycle Bin. You need to replicate the restored user account as quickly as possible. Which cmdlets should you run? A. Get-ADReplicationSite and Set-ADReplicationConnection
B. Get-ADReplicationAttributeMetadata and Compare-Object
C. Get-ADReplicationUpToDatenessVectorTable and Set-ADReplicationSite
D. Get-ADDomainController and Sync-ADObject Answer: D QUESTION 19 You implement a new virtualized print server that runs Windows Server 2012. You need to migrate the print queues. Which tool should you use? A. Windows Server Migration Tools
B. Active Directory Migration Tool (ADMT)
C. Print Management
D. Computer Management Answer: C QUESTION 20 You need to recommend a fault-tolerant solution for the VPN. The solution must meet the technical requirements. What should you include in the recommendation? A. DirectAccess
B. Failover Clustering
C. Network adapter teaming
D. Network Load Balancing (NLB) Answer: D
