QUESTION 16   You need to deploy the Configuration Manager client to all of the client computers in the Seattle office. What is the best deployment method to use? More than one answer choice may achieve the goal. Select the BEST answer. A.   software update-based   B.   client push   C.   a logon script D.   manual   Answer: A QUESTION 17   You need to recommend a solution for enabling licensing reports based on the compliance requirements. Which two actions should you include in the recommendation? Each correct answer presents part of the solution. A.   From the Assets and Compliance workspace of the Configuration Manager console, import license data in the CSV format.   B.   From the Administration workspace of the Configuration Manager console, modify the Default Client Settings.   C.   From the Assets and Compliance workspace of the Configuration Manager console, edit the inventory classes.   D.   From the Administration workspace of the Configuration Manager console, modify CCS3.   E.   From the Assets and Compliance workspace of the Configuration Manager console, import license data in the XML format. Answer: AD QUESTION 18   You need to identify the steps required to manage the Windows Phone devices of the sales users. Which two actions should you perform from the Administration workspace of the Configuration Manager console? Each correct answer presents part of the solution. A.   Create a security role in Configuration Manager.   B.   Configure an access rule. C.   Run the Add Exchange Server wizard.   D.   Create an out of band service point E.   Add a Windows Intune subscription. Answer: BC QUESTION 19   Drag and Drop Question   You need to identify the steps required to install new applications for the Seattle office users. Which four executables or cmdlets should you run in sequence? To answer, move the appropriate executables or cmdlets from the list of executables or cmdlets to the answer area and arrange them in the correct order.

Answer:

QUESTION 20   You need to prepare Server11. Which two actions should you perform? Each correct answer presents part of the solution. A.   Create a file named No_sms_on_drive in the root of drive C.   B.   From the Add Site System Roles Wizard, set the primary package share location to Automatic.   C.   From the Add Site System Roles Wizard, set the primary content location to E.   D.   From the Add Site System Roles

Wizard, set the primary package share location to E.   E.   Copy Prepdrv.inf to the root of drive C. Answer: AB QUESTION 21   Hotspot Question   You need to recommend a procedure for collecting Configuration Manager hardware inventory in the Montreal and Toronto offices. What should you recommend? In the table below, select the configurations to perform for each hardware inventory. Make only one selection in each row.

Answer Area

Configuration	Montreal office hardware inventory	Toronto office ha...inventory
Add a class to the Default Client Settings.	○	○
Enable a class in a custom Client Settings object.	○	○
Create NOIDMIF files on the client computers.	○	○
Create IDMIF files on the client computers.	○	○

Answer:

Answer Area

Configuration	Montreal office hardware inventory	Toronto office hardware inventory
Add a class to the Default Client Settings.	●	○
Enable a class in a custom Client Settings object.	○	●
Create NOIDMIF files on the client computers.	○	●
Create IDMIF files on the client computers.	●	○

QUESTION 22   Hotspot Question   You need to create a configuration item that will evaluate the compliance of the Configuration Manager client cache size. Which settings should you configure? To answer, select the appropriate options in the answer area.

Answer Area

Configuration item data settings:
- Registry value
- Script
- WQL query

Configuration item data type:
- Boolean
- String

Configuration item compliance rule type:
- Existential
- Value

Answer:

Answer Area

Configuration item data settings:
- Registry value
- **Script**
- WQL query

Configuration item data type:
- Boolean
- **String**

Configuration item compliance rule type:
- Existential
- **Value**

Case Study 3 - Contoso, Ltd. (QUESTION 23 - QUESTION 29)   Overview   Contoso, Ltd. is private company that has 2,000 employees. Contoso has a main office and two branch offices. The main office is located in Seattle. The branch offices are located in Los Angeles and New York City.   Existing Environment   Active Directory   The network contains one Active Directory forest named contoso.com. A child domain named dev.contoso.com is used for development and testing purposes. An Active Directory site with corresponding IP subnets exists for each location.   Network Infrastructure   The Seattle office has approximately 1,000 users and 1,000 client computers. The New York City and Los Angeles offices each have approximately 500 users and 500 client computers. Some of the computers run Windows 7 Enterprise. The remaining computers run Windows 8 Enterprise. The Seattle office tests 100 Microsoft Surface RT devices. All servers in the forest run Windows Server 2012 R2. The contoso.com domain contains the servers shown in the following table.
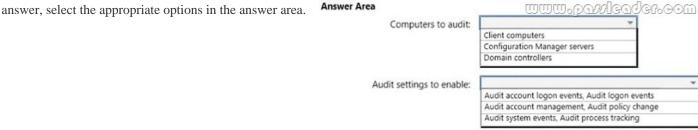

| Host name	Configuration	Location
DC01	• DNS server • DHCP server • Domain controller	Seattle
DC02	• DNS server • Domain controller	Seattle
DC03	• DNS server • DHCP server • Domain controller	Los Angeles
DC04	• DNS server • DHCP server • Domain controller	New York City
Host01	Hyper-V server	Seattle
Host02	Hyper-V server	Seattle
Host03	Hyper-V server	Seattle
WSUS01	Windows Server Update Services (WSUS) server	Seattle
WSUS02	Windows Server Update Services (WSUS) server	New York City
WSUS03	Windows Server Update Services WSUS) server	Los Angeles
RDS01	• Remote Desktop Web Access (RD Web Access) server • Remote Desktop Licensing (RD Licensing) server • Remote Desktop Session Host (RD Session Host) server	Seattle
RDS02	• Remote Desktop Web Access (RD Web Access) server • Remote Desktop Session Host (RD Session Host) server • Remote Desktop Connection Broker (RD Connection Broker) server	Seattle
RDS03	• Remote Desktop Web Access (RD Web Access) server • Remote Desktop Session Host (RD Session Host) server	Seattle
SC01	Microsoft System Center 2012 R2 Configuration Manager server	Seattle
SC02	Microsoft System Center 2012 R2 Operations Manager server	Seattle
SC03	Microsoft System Center 2012 R2 Virtual Machine Manager (VMM) server	Seattle
Appv01	Microsoft Application Virtualization (App-V) 5.0 Service Pack 2 (SP2) management server and publishing server	Seattle

Update Infrastructure   The existing update infrastructure has the following characteristics: - WSUS01 is configured as the parent upstream update server for WSUS02 and WSUS03.   - A server named WSUS04 is located in an isolated test network that is not connected to the production network. WSUS04 has WSUS installed.   Configuration Management Infrastructure   The existing configuration management infrastructure has the following characteristics: - Automatic software metering rule generation is enabled and has the default settings configured.   - The Configuration Manager client is installed on all of the client computers.   - The client status for reporting is scheduled to occur once weekly.   Problem Statements   Developers in the dev.contoso.com

domain frequently conduct stress tests on applications. These tests can last several days. Some developers report that even if they stop System Center-related services on the test computer before they perform the tests, the services restart during the tests, and sometimes cause the tests to fail.   Requirements   Planned Changes   Contoso plans to implement the following changes to the application environment: - A new 64-bit application named App3 will be made available to the client computers in the Seattle office.   - Infrequently used applications will be uninstalled from all of the client computers.   - System Center Updates Publisher 2011 will be used to deploy application updates.   - An application named App4 will be deployed to all users.   - Contoso plans to implement the following changes to the Configuration Manager environment: - Each office will have customized Configuration Manager client settings.   - Software metering will be used to monitor and collect client computer information.   - Client computers that are missing a specific registry setting will be moved automatically to a collection named Not Configured.   - New client computers in the dev.contoso.com domain will be monitored for compliance, based on a third-party configuration pack supplied by a vendor.   - An additional 50 client computers will be added to the dev.contoso.com domain.   Technical Requirements   Contoso identifies the following technical requirements for the Configuration Manager environment: - Application updates must be available in all of the offices.   - All of the configuration packs in use must be customizable.   - App4 must be deployed only to the primary device of each user.   - All of the client computers must be inventoried by using custom WMI classes.   - User device affinity must be automated so that users are associated automatically to the device they use most.   - The Configuration Manager client must be installed automatically on all new client computers the first time the computers are authenticated by the domain. The management team identifies the following miscellaneous requirements: - All solutions must minimize administrative effort, whenever possible.   - Surface RT devices must have access to App3. QUESTION 23   You need to recommend a solution to resolve the issue faced by the developers. What should you include in the recommendation? A.   From Configuration Manager, modify the Client Policy client settings.   B.   From Configuration Manager, modify the Computer Agent client settings.   C.   From the registry, set the Manual Execution Requested value to 1.   D.   From the registry, set the Notify Only value to True. Answer: B QUESTION 24   You need to recommend a solution to move the client computers to the Not Configured collection. What should you include in the recommendation? A.   an automatic deployment rule   B.   a compliance rule   C.   a task sequence   D.   a boundary group Answer: C QUESTION 25   The vendor provides you with the new configuration pack. You need to configure the environment to meet the requirements. What should you do? A.   Run the Create Configuration Item Wizard and specify the Line of Business category.   B.   Run the Import Configuration Data Wizard and use the default settings.   C.   Run the Import Configuration Data Wizard and select Create a new copy of the imported configuration baselines and configuration items.   D.   Run the Create Configuration Item Wizard and specify the Client category. Answer: C QUESTION 26 Hotspot Question   You need to recommend a solution to deploy App4. What should you include in the recommendation? To answer, select the appropriate options in the answer area.

Answer Area

Computers to audit:	
Client computers	
Configuration Manager servers	
Domain controllers	

Audit settings to enable:	
Audit account logon events, Audit logon events	
Audit account management, Audit policy change	
Audit system events, Audit process tracking	

Answer:

Answer Area

Computers to audit:	
Client computers	
Configuration Manager servers	
Domain controllers	

Audit settings to enable:	
Audit account logon events, Audit logon events	
Audit account management, Audit policy change	
Audit system events, Audit process tracking	

QUESTION 27   You need to publish the application updates. What is the best server or servers to configure Updates Publisher 2011 to use? More than one answer choice may achieve the goal. Select the BEST answer. A.   WSUS01,

WSUS02, and WSUS03   B.   SCO1 only   C.   all of the WSUS servers
D.   WSUS01 only Answer: D QUESTION 28   Hotspot Question   You need to meet the inventory
requirements. What should you do? To answer, select the appropriate options in the answer area.   **Answer Area**

File type to create:

Settings to modify:

Answer: **Answer Area**
