New 70-535 dumps PDF: https://drive.google.com/open?id=1Tqc3nKkqLq3RuEdZ4qV-ddYyN5SwbSNB ~~~ New Case Studies ~~~ Case Study 9 ? Contoso Pharmaceutical (QUESTION 285 ? QUESTION 292) Case Study 10 ? Contoso, Ltd. (B) (QUESTION 293 ? QUESTION 295) Case Study 11 ? Trey Research Inc. (QUESTION 296 ? QUESTION 300) ~~~ New Drag and Drop Questions ~~~ NEW QUESTION 278   Drag and Drop   You are developing an ASP.NET Software-as-a-Service (SaaS) application that stores database credentials in Azure Key Vault. When the application encounters an error, information about the error is shown to the end user for support purposes. Information shown includes: ? stack trace   ? application version and release date   ? configuration values   Database credentials must not be accessible to end users. You need to ensure that end users cannot view database credentials. Which three actions should you perform in sequence?   ??   NEW QUESTION 279   Drag and Drop   You are testing an application. You observe errors being reported in the browser. The error logs indicate the issue is related to JavaScript code that runs in the application. You need to configure Azure Application Insights on the client side to monitor the issues. Which key and value should you use?   ?? NEW QUESTION 280   Drag and Drop   You are a system administrator at your company. You are planning to deploy virtual machine (VM) scale sets to support autoscaling of VMs in and out. The environment will include 150 customized VMs managed within the scale set. You need to configure the scale set for autoscaling of the VMs. What should you do?   ?? NEW QUESTION 281   Drag and Drop   You are building a set of deployment scripts for an Azure application that will be used by developers. The application is deployed using Azure Resource Manager and requires a set of Parameters stored in Azure Key Vault during deployment. Developers do not have permissions to view the contents of the Key Vault. You need to ensure that developers can deploy the application. What should you do?   ?? NEW QUESTION 282   Drag and Drop   You are developing a commercial REST API by using Azure API Management. Access to the API is managed by subscription, which can represent applications over a wide geographic area. You receive several issue reports.   ? The API becomes unavailable when certain subscribers perform a large number of requests on the API.   ? URLs returned from the API that refer to REST entities do not have the correct hostname.   ? Customers and support staff report insufficient information when debugging failed calls.   You need to configure policies to address these issues. How should you complete the XML markup?   ?? NEW QUESTION 283   Drag and Drop   You are developing an ASP.NET MVC application that will be hosted in Azure. The application will manage employee information. The application will use the Azure Table storage service. You create account. You store the connection string information in the web.config file in a key named EmployeeStorageConnectionString. You have the following code: ??   You declare variable named employee1 and employee2 as EmploeeEntity objects. You need to insert the new entities in the same single batch operation. Develop the solution by selecting and arranging the required five code blocks in the correct order. ?? NEW QUESTION 284   Drag and Drop   You maintain an application that runs in Azure. You instrument the application using Application Insights. Some users report that the response time for page loads is high, but only during busy times. The reports started in the last week. Initial investigation reveal no significant difference in average response time throughout the day. You need to determine time periods when response time may be high. How should you complete the query?   ??
